**Reviewed by SWCAA:** Mihai Voivod

☒ Approved

The Washington State Dangerous Waste Regulations (WAC 173-303) require that demolition debris be evaluated to determine if it is dangerous. The evaluation should be completed before demolition to ensure that hazardous constituents are not released to the environment and do not present a risk to human health during or after demolition. These requirements apply to all buildings being demolished and are the responsibility of the property owner. The Washington Department of Ecology's website, <https://ecology.wa.gov/Regulations-Permits/Guidance-technical-assistance/Dangerous-waste-guidance/Common-dangerous-waste/Construction-and-demolition>, provides more information about the requirements and about sampling and testing construction materials to determine if they present a risk. For more information please contact a Hazardous Waste Inspector at the Washington Department of Ecology Southwest Regional Office: (360) 407-6300.

RE: Letter of Completion – WSDOT 657 Maryland Ave Abatement – Job #224005  
Order Number T092347  
657 NW Maryland Ave  
Chehalis, WA 98532

Please consider this document as our letter of completion for the asbestos abatement that occurred at the site at the above-mentioned address. 3 Kings Environmental, Inc. removed all Hazardous Building Material documented in the project specifications, which included sheet vinyl flooring. All work was performed with state certified and trained personnel in accordance with all local, state and federal regulations.

If there are any questions regarding the abatement on the above-mentioned project, please don't hesitate to contact me.

Thank you,

Emily Weiss  
Asbestos Division Project Manager
