Asbestos Containing Materials Inspection

Good Faith Inspection

March 26, 2024

Prepared For: Ken Piper
211 NE 17th St.
Battle Ground, WA 98604

Project: 100 SE Leadbetter Road
Camas, WA 98607

RE: Good Faith Asbestos Survey

FRONT OF STRUCTURE

INSPECTION REPORT

BACKGROUND

On March 19th, 2024, 3 Kings Environmental, Inc. performed a Good Faith Asbestos Inspection of the above mentioned project to determine the presence of asbestos containing materials (ACMs). The intent of this inspection is to ensure that the property owner is in compliance with the regulatory requirements for the identification of ACMs prior to any demolition or renovation activities.

BUILDING DESCRIPTION

The structure was a wood framed single family residence. The home was on a raised foundation and sustained substantial fire damage.

Year Built: 1925

Approximate size: 1,540 SF

Interior Finishes:

The interior of the home was primarily drywall walls and ceiling texture. Floors were primarily carpet with the kitchen and bathrooms being sheet vinyl.

Exterior Finishes:

The exterior of home consisted of aluminum windows, wood siding, wood trim and asphalt type roofing shingles.

SAMPLING PROCESS

All accessible areas of the specific work area were sampled during the inspection. Inaccessible areas are those defined as requiring select demolition, fall protection, repair to the structure i.e. weather protection or water proofing or are considered a confined space entry. If during the course of asbestos abatement or demolition suspect materials are discovered that are not identified on this report stop work immediately. These materials need to be treated as asbestos containing until the material can be tested by an AHERA Building Inspector and determined otherwise.

Suspect materials were collected by an AHERA certified building inspector. Samples are then given a unique identification number. Sample information such as type of material and its locations are then placed on the chain of custody that accompany the samples to the testing laboratory. Once the samples are delivered to an asbestos laboratory for analysis. Samples are analyzed by polarized light microscopy (PLM) with dispersion staining in accordance with USEPA 600/M-82/020, which has a reliable limit of quantification of one percent asbestos by volume.

Samples were collected following EPA guidelines. The suspect materials are broken down into three categories: Surfacing Materials, Thermal System Insulation, and Miscellaneous Materials. Each of these categories have a set of guidelines that were followed that include the number of samples required for that particular category based on the quantity of the material, how the material was applied and what was the intent of the material. All these factors are accounted for during the time of inspection.

AHERA Certified Building Inspector

Certified AHERA Building Inspector was Daniel Garcia

Certification # BI/R-NES-01-12-24-16, Expiration January 12th, 2025.

SURVEY FINDINGS

Materials found to contain asbestos in concentrations greater than one percent (>1%) as part of this investigation and estimated quantities for removal:

Sample #	Material Description	Sample Location	Friability / Condition / Category	Lab Result	Quantity
09 - 10	Blue Tile Layer found under the Green Self-stick top layer	Bathroom	NF / Damaged	8% Chrysotile-Tile	40 SF

The following is a summary of all the suspect bulk asbestos sampled during the inspection.

Sample #	Material Description & Location	Friability & Condition	Material Category	Lab Result
01	Red Sheet Vinyl Flooring / Second Layer flooring / Living room	NF / Poor	M	NAD
02	Red Sheet Vinyl Flooring / Second Layer flooring / Dining room	NF / Poor	M	NAD
03	Beige Sheet Vinyl Flooring first layer floor / Dining Room	NF / Poor	M	NAD
04	Beige Sheet Vinyl Flooring first layer floor / Dining Room	NF / Poor	M	NAD
05	Brown Sheet Vinyl Flooring Under Laminated / Office Room	NF / Poor	M	NAD
06	Brown Sheet Vinyl Flooring Under Laminated / Office Room	NF / Poor	M	NAD
07	Light Brown self-stick Tile Second Layer floor / Bathroom	NF / Poor	M	NAD
08	Light Brown self-stick Tile Second Layer floor / Bathroom	NF / Poor	M	NAD
09	Blue Tile Layer found under the Green Self-stick top layer / Bathroom	NF / Poor	M	8% Chrysotile-Tile
10	Green Self-stick top layer / Bathroom	NF / Poor	M	PACM
11	Drywall, Joint Compound, Texture / Bathroom	F / Damaged	S	NAD
12	Drywall, Joint Compound, Texture / Bathroom	F / Damaged	S	NAD
13	Drywall, Joint Compound, Texture / Bathroom	F / Damaged	S	NAD
14	Ceiling Texture / Living Room	F / Damaged	S	<1% Chrysotile

15	Ceiling Texture / Dining Room	F / Damaged	S	<1% Chrysotile
16	Ceiling Texture Wall / Living Room	F / Damaged	S	<1% Chrysotile
17	Drywall Joint Compound / Hallway	NF / Poor	M	NAD
18	Drywall Joint Compound / Hallway	NF / Poor	M	NAD
19	Ceiling Tile / Living Room	NF / Poor	M	NAD
20	Ceiling Tile / Living Room	NF / Poor	M	NAD
21	3 Tap Roofing	NF / Poor	M	NAD
22	3 Tap Roofing	NF / Poor	M	NAD
23	Roof Felt Paper	NF / Poor	M	NAD
24	Roof Felt Paper	NF / Poor	M	NAD
25	Window Caulking / Exterior Aluminum Window	NF / Poor	M	NAD
26	Window Caulking / Exterior Aluminum Window	NF / Poor	M	NAD

Legend: NAD – No Asbestos Detected F – Friable (can be pulverized by hand pressure) NF – Non-Friable PACM – Presumed Asbestos Containing Material	Category: S – Surfacing Material TSI – Thermal System Insulation M – Miscellaneous Material
--	---

ADDITIONAL OBSERVATIONS

Lead Paint and Other Metals

Lead-based paint was not sampled as part of this survey. Based on the age of the structure lead based paints should be assumed.

Lead safe work practices and appropriate precautions should be utilized during all work impacting painted surfaces.

Microbial Growth

Water damage and potential microbial growth were not observed as part of this sampling. Appropriate precautions should be utilized during work.

PCBs, Mercury Bulbs and Mercury Thermostats

PCBs, Mercury Bulbs and Mercury Thermostats were not tested or examined as part of this survey. Appropriate precautions should be utilized during work.

Inaccessible Components

No inaccessible components spaces were observed at the time of the inspection.

RESULTS AND RECOMMENDATIONS

Of the twenty-six (26) suspect bulk materials sampled one (1) tested positive for asbestos with a concentration greater than 1%. One additional sample is noted as presumed asbestos containing materials (PACM) as they were designated for positive stop. Three additional samples were noted as asbestos with a concentration less than 1%.

3 Kings Environmental, Inc. recommends that any ACM or PACM to be impacted during the course of the renovation or demolition be removed by a licensed, bonded, and insured asbestos abatement firm. Removal and disposal of asbestos containing materials should only be performed by certified firms following all local, state, and federal guidelines. Should materials not noted in this report be discovered during the course of the work, stop all demolition and have the newly discovered materials tested for asbestos or treat the materials as an asbestos containing material. Be sure to notify the governing authorities and clean-air agencies prior to disturbing materials over the recordable limits.

The conclusions/ recommendations of the report are professional opinions based solely on visual observations and interpretation of sample results from our third-party laboratory. Re-use of this document for other than its intended purpose is at the sole risk of said user. 3 Kings Environmental, Inc. cannot be held responsible for the interpretation by others of the data contained in this report as site conditions or regulations may have changed. 3 Kings Environmental makes no warranty, expressed or implied for information found in this report.

If you have any questions regarding this asbestos survey/inspection report, please contact me at (360) 949-5822, or email: jhawks@3kingsinc.com

Respectfully submitted,
3 Kings Environmental, Inc.

Jason Hawks
Certified AHERA Building Inspector

Dear Daniel Garcia,

We at SanAir would like to thank you for the work you recently submitted. The 26 sample(s) were received on Friday, March 22, 2024 via UPS. The final report(s) is enclosed for the following sample(s): 01, 02, 03, 04, 05, 06, 07, 08, 09, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26.

These results only pertain to this job and should not be used in the interpretation of any other job. This report is only complete in its entirety. Refer to the listing below of the pages included in a complete final report.

Sincerely,

A handwritten signature in black ink that reads "Sandra Sobrino".

This report and any information contained within shall not be edited, altered, or modified in any way by any persons or agencies receiving, viewing, distributing, or otherwise possessing a copy of this final report. The laboratory reserves the right to perform amendments to any finalized report, of which shall supersede and make obsolete any previous editions. Such changes, modifications, additions, or deletions shall be effective immediately upon notice thereof, which may be given by means including but not limited to posting on the SanAir client portal website, electronic or conventional mail, or by any other means. The information provided in this report applies only to the samples submitted and is relevant only for the date, time, and location of sampling. The accuracy of the results is dependent upon the client's sampling procedure and information provided to the laboratory by the client on the COC. SanAir assumes no responsibility for the sampling procedure and will provide evaluation reports based solely on the sample(s) in the condition in which they arrived at the laboratory and information provided by the client on the COC, such as: project number, project name, collection dates, po number, special instructions, samples collected by, sample numbers, sample identifications, sample type, selected analysis type, flow rate, total volume or area, and start stop times that may affect the validity of the results in this report. Samples were received in good condition unless otherwise noted on the report. SanAir assumes no responsibility or liability for the manner in which the results are used or interpreted. This report does not constitute nor shall not be used by the client to claim product, process, system, or person certification, approval, or endorsement by NVLAP, NIST, NELAC, AIHA LAP, LLC or any other U.S. governmental agencies and may not be accredited by every local, state, and federal regulatory agencies. Samples are held for a period of 60 days. Fibers smaller than 5 microns cannot be seen with this method due to scope limitations. For NY state samples, method EPA 600/M4-82-020 is performed.

NYELAP Disclaimer:

Polarized- light microscopy is not consistently reliable in detecting asbestos in floor covering and similar non-friable organically bound materials. Quantitative transmission electron microscopy is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos containing.

If no technician is provided, then the primary contact for your account will be selected. Unless scheduled, the turnaround time for all samples received after 3 pm EST will be logged in the next business day. Weekend or holiday work must be scheduled ahead of time and is charged at 150% of the 3hr TAT or a minimum charge of \$150. A courier charge will be applied for same day and one-day turnaround times for offsite work. SanAir covers Standard Overnight FedEx shipping. Shipments billed to SanAir with a faster shipping rate will result in additional charges.

CERTIFICATION

AHERA

CERTIFICATE

This is to certify that

Daniel Garcia

has attended and satisfactorily completed all requirements to maintain accreditation as an AHERA Building Inspector in accordance with the Toxic Substance Control Act Title (Section 206) and 40 CFR 763.

Accreditation No. BI/R-NES-01-12-24-16

Course Date: January 12th, 2024

Valid through: January 12th 2025
