The Washington State Dangerous Waste Regulations (WAC 173-303) require that demolition debris be evaluated to determine if it is dangerous. The evaluation should be completed before demolition to ensure that hazardous constituents are not released to the environment and do not present a risk to human health during or after demolition. These requirements apply to all buildings being demolished and are the responsibility of the property owner. The Washington Department of Ecology's website, <https://ecology.wa.gov/Regulations-Permits/Guidance-technical-assistance/Dangerous-waste-guidance/Common-dangerous-waste/Construction-and-demolition>, provides more information about the requirements and about sampling and testing construction materials to determine if they present a risk. For more information please contact a Hazardous Waste Inspector at the Washington Department of Ecology Southwest Regional Office: (360) 407-6300.

Re: Demolition of Detached Shed

Mr. Nicolas Martin:

Based on the information and photos provided by Nicolas Martin of the detached **shed at 926 E Street in Centralia, Washington**, I find no evidence of asbestos containing materials that would require further action prior to the demolition / deconstruction of this structure (residential and other buildings excluded).

These conclusions are based on the information Nicolas Martin provided and the attached pictures sent to me. SWCAA is not responsible for any asbestos-containing material that might be behind walls, under floors, underground or in any area not depicted in the referenced photographs. If suspect asbestos containing material is discovered during demolition, the project must stop and an AHERA certified building inspector should be consulted. An AHERA inspection must also be performed prior to the demolition of any residential structure or other building not depicted in the attached photos.

A Notification of Demolition for the detached shed is required to be submitted to SWCAA prior commencement of demolition activity. A copy of this letter must be kept on-site during the demolition.

If you have any questions regarding this matter, please call me at 360-574-3058 x113.

Sincerely,

Mihai Voivod
Air Quality Specialist I
