Limited Asbestos Survey Report

Owner/Operator Name: Robinson restoration

Owner/Operator Number: 3609472738

Limited Survey Date 11/29/2024

What is the structure's past use? Residential home.

Building Square Footage: 1874

Survey Address: 2333 NW Galaxy St
Camas , WA , 98607

Survey Location: garage and closet under stairs

What is the building's description? residential

What is this structure's current use? residential

Number of Floors: 2

Area Surveyed: garage and closet under stairs

Approximate Build Date:1977

Purpose of the Survey: water damage

Survey Limitations: only drywall

Robinson Restoration - 10616 NE 124th Ave Vancouver, WA 98682 - (360) 947-2738 - www.robinsonrestore.com

area as defined in the analysis report. Samples were collected from accessible, representative construction materials, which were suspected to contain asbestos. If additional materials are found during the demolition process that were inaccessible at the time of inspection that are not listed in this report, please have materials tested before they are impacted. Survey is subject to direction from contractor, homeowner or owners agent.

The Oregon Department of Environmental Quality regulates the handling, removal and disposal of asbestos-containing material to protect public health and the Environment.

Disclaimer

- EPA Method 600/M4-82-020 (1982) was used to determine the presence or absence of asbestos fibers in all materials referenced in the above report. PLM analysis is based on visual estimation, and due to limitations of PLM analysis NESHAP regulations recommend that any material determined to contain less than 10% asbestos by the above referenced method should either be assumed to contain greater than 1% asbestos by the owner/operator, or be verified by PLM Point Count or TEM analysis as containing less than 1% asbestos.
- We recommend that TEM analysis be conducted for confirmation of negative PLM analytical results of vinyl floor tiles and vermiculite. These materials may contain asbestos fibers that cannot be detected by PLM analysis due to their size (<0.25 microns in diameter)
- This report may not be used to represent any materials not analyzed and listed in the included report. Advantage Environmental Inc. cannot be held responsible for the interpretation of the results shown. This report may not be reproduced in part and may only be reproduced in full without prior written consent from Advantage Environmental Inc.
