

Southwest Clean Air Agency

INSTRUCTIONS FOR PERMIT APPLICATION

Use this sheet as a checklist to determine when your application is substantially complete.

- ☞ Each PERMIT APPLICATION for the construction, installation, or establishment of a new air contaminant source, or modification of existing air pollution source or control equipment or permit needs to be accompanied by the following information to be considered complete:

Included N/A

- | | | |
|--------------------------|--------------------------|---|
| <input type="checkbox"/> | <input type="checkbox"/> | Process flow sheets and equipment layout diagrams. |
| <input type="checkbox"/> | <input type="checkbox"/> | Process and control equipment manufacturer, model number, size, serial number, date of manufacture (for each piece of control equipment). |
| <input type="checkbox"/> | <input type="checkbox"/> | Quantify average and maximum hourly throughput values, average yearly totals, and maximum concentrations for each pollutant. |
| <input type="checkbox"/> | <input type="checkbox"/> | Applicant's calculation of the kinds and amounts of emissions for each emission point, materials handling operation or fugitive category (both controlled and uncontrolled). |
| <input type="checkbox"/> | <input type="checkbox"/> | Plot plan including identification of proposed emission points to the atmosphere, distance to property boundaries, height of buildings, and stack height above ground level. |
| <input type="checkbox"/> | <input type="checkbox"/> | Identification of raw materials and/or product specifications (physical and chemical properties) and typical ranges of operating conditions as related to each emission point (toxic air contaminants require a separate summary); Material Safety Data Sheets (MSDSs) should be included in the PERMIT APPLICATION for all compounds used. |
| <input type="checkbox"/> | <input type="checkbox"/> | Identification of the methods/equipment proposed for prevention/control of emissions to the atmosphere. |
| <input type="checkbox"/> | <input type="checkbox"/> | Information sufficient to demonstrate the ability of the emission controls proposed as being consistent with those provided in the applicable regulations (BACT/NSPS/RACT/NESHAPS/LAER analysis) – see attached worksheet for typical layout of BACT analysis information. |
| <input type="checkbox"/> | <input type="checkbox"/> | The kinds and amounts of emission offset credits proposed for assignment when operations are within a maintenance boundary (see SWCAA 400-120 and 400-130). |
| <input type="checkbox"/> | <input type="checkbox"/> | Estimates of the proposed project ambient impact under average and least favorable conditions where pertinent to PSD (WAC 173-400-171) or Toxic Air Pollutants (WAC 173-460) requirements. |
| <input type="checkbox"/> | <input type="checkbox"/> | Additional information, evidence, or documentation as required by the Board of Directors, or the Control Officer, to show that the proposed project will meet federal, state, and local air pollution control regulations. |
| <input type="checkbox"/> | <input type="checkbox"/> | For applications that include equipment that has previously been approved, authorized or registered, a lapse is considered to have occurred if the registration fees are delinquent for more than one calendar year or the source has not operated within five years prior to the receipt of any required PERMIT APPLICATION (SWCAA 400-030(56) and SWCAA 400-110). |
| <input type="checkbox"/> | <input type="checkbox"/> | Applications that include previously approved or authorized equipment require that additional information regarding previous owners or approvals be provided so that SWCAA records can be updated. Equipment registered and/or approved for a given company cannot be authorized without a legal name change, purchase of company or equipment, or a legal contract or subcontract to do business with or for the approved source. Responsibility for operation of authorized equipment rests with the registered source. |
| <input type="checkbox"/> | <input type="checkbox"/> | All applications need to be accompanied with a completed SEPA checklist or SEPA determination. |
- ☞ The application transmittal shall conform to SWCAA review requirements wherever possible as detailed in SWCAA General Regulations for Air Pollution Sources (SWCAA 400).
- ☞ Each drawing, document, or other form of transmittal considered by the applicant to be proprietary and confidential must be suitably identified as confidential in red ink, and signed and dated by the applicant or its agent. Be aware that SWCAA follows the requirements in SWCAA 400-270 and 40 CFR 2 for determination of confidentiality. SWCAA may not process company sensitive information as confidential.
- ☞ Air Discharge Permits (to construct, modify, or install) are issued for specific equipment or processes described in the application. Changes to the processes or control equipment are not allowed without new source review (Permit Application and Permit) if these changes result in an emission of a different type or an increase in emissions (SWCAA 400-110). Process equipment changes that result in decreased emissions require notification to SWCAA.
- ☞ The SIC code is identified as the four digit major group classification in the 1987 Standard Industrial Code Classification Manual or refer to the SWCAA website at <http://www.swcleanair.gov/forms.html> for a listing of SIC codes and NAICS Codes.
- ☞ Mail or deliver in person the completed application package to:
- Southwest Clean Air Agency
11815 NE 99th Street, Suite 1294
Vancouver, WA 98682-2322
- ☞ **Application and engineering review fees must accompany the application for the application to be considered complete. Make checks payable to "Southwest Clean Air Agency" or "SWCAA."**
- ☞ **The PERMIT APPLICATION package submitted must be complete. All applications are screened for completeness before processing. Applicants submitting incomplete application packages will be notified of their incomplete status and may result in a delay in processing the application.**

Southwest Clean Air Agency

A permit application review fee is required with the submittal of each permit application. There is a base fee composed of an application fee and an engineering review fee from the **Consolidated Fee Schedule (Table 2 or 9)**, which is based on the primary emission unit or activity of the proposed new, modified or altered "stationary source." Permit application review fees based on emissions are determined using the proposed emissions (after controls) as supported by test data or emission factors and review fees based on equipment capacity or size are to utilize the design capacities of affected equipment.

If the staff time required to review a permit application exceeds the number of review hours associated specified in the Consolidated fee Schedule (Table 2 or 9), the applicant will be invoiced for each additional work hours.

Consolidated Fee Schedule (Table 2 or 9) <http://www.swcleanair.gov/fees/index.asp>

FEE CALCULATION

APPLICATION FEE **Required** \$ _____ If expedited, double fee

ENGINEERING REVIEW FEE **Required** + \$ _____ Enter the fee for the *primary* equipment/activity from the **Consolidated Fee Schedule (Table 9)** or if you want an expedited review, enter double the fee from the **Consolidated Fee Schedule (Table 2 or 9)**

TOTAL FEE \$ _____ ← Submit this amount with application

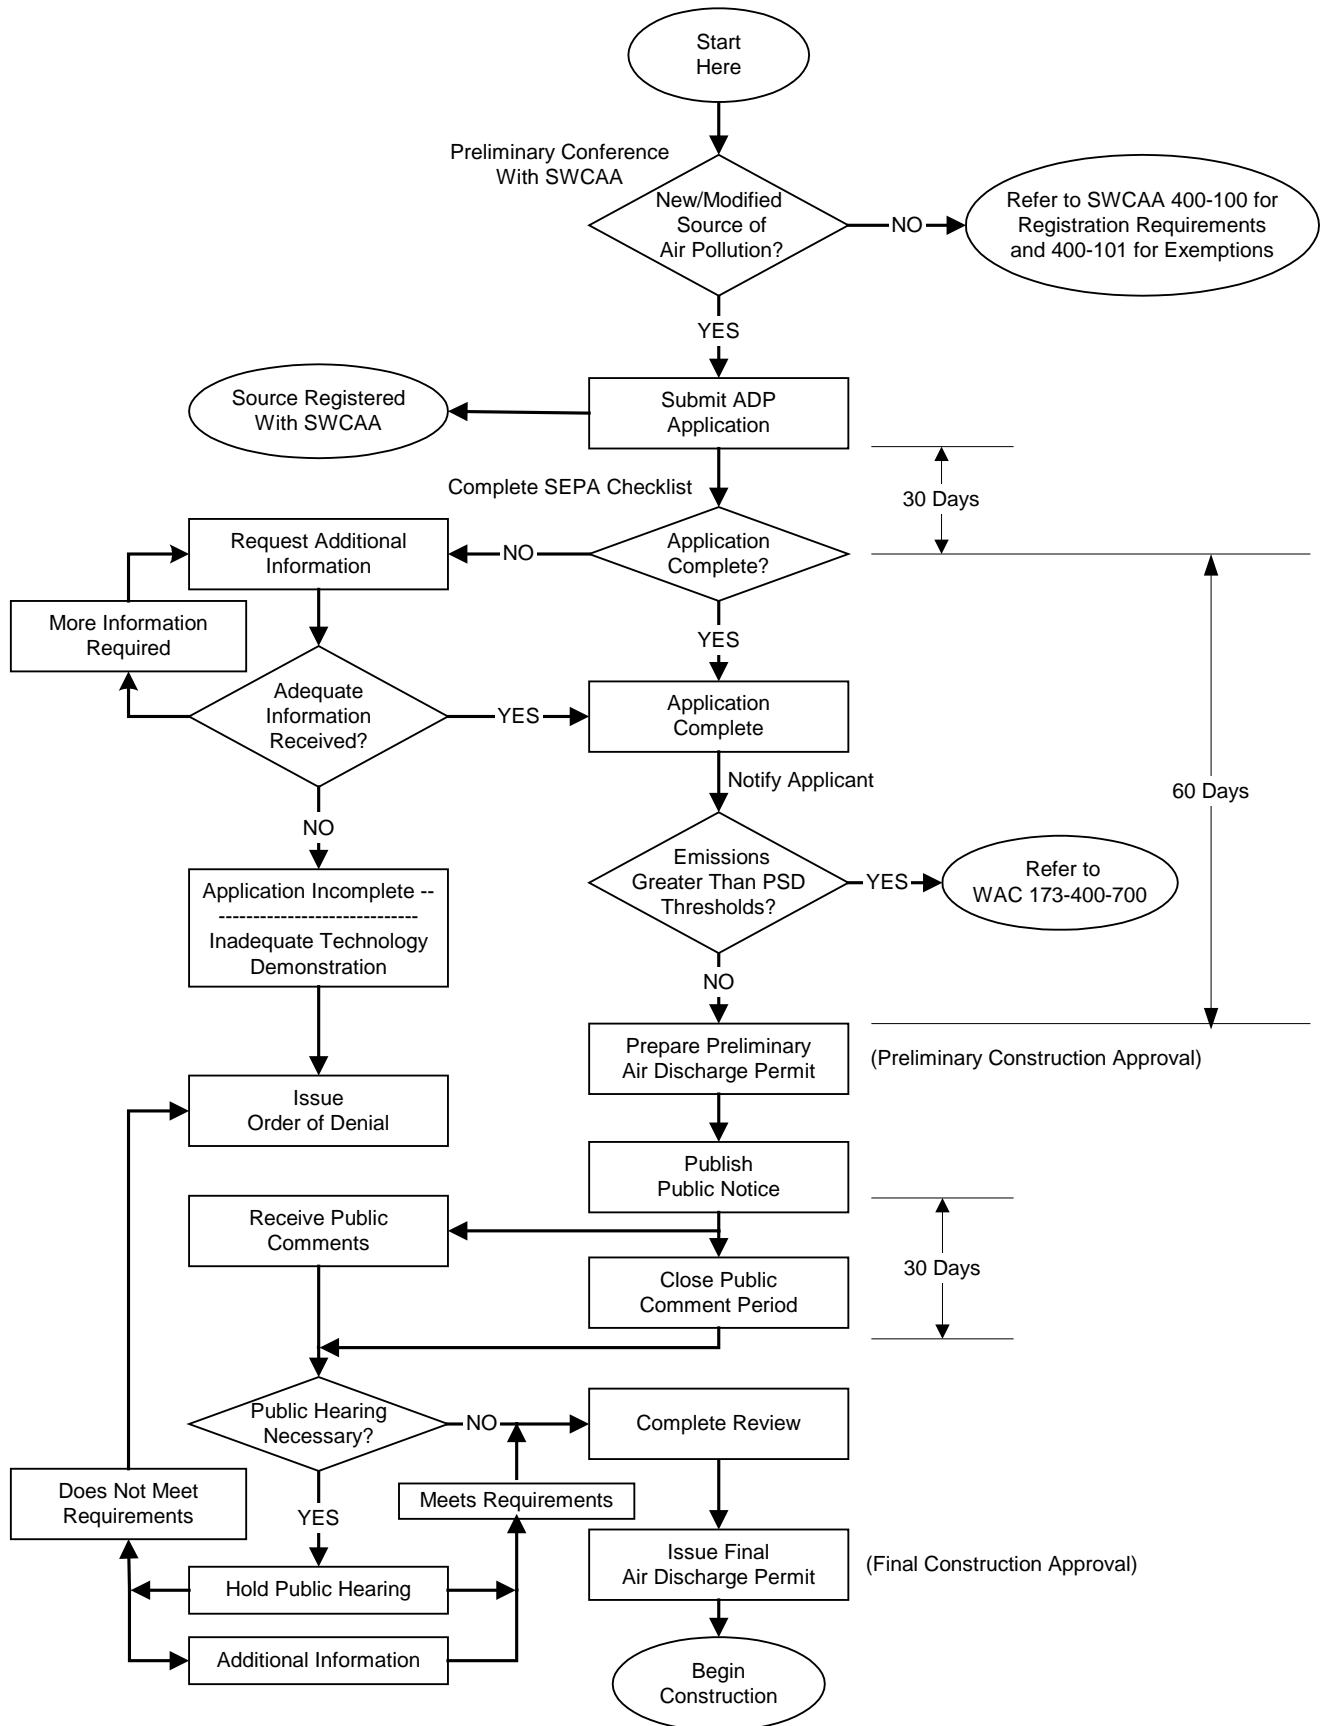

Additional Fees

After you have submitted your application and the fee above, **contact SWCAA concerning any additional applicable fees.** You will be invoiced for any additional fees prior to the issuance of your final permit.

- Legal Notice Fee. The fee plus the actual publication cost of the legal notice; See **Consolidated Fee Schedule (Table 2 or 9)**
- Additional Review Time Fee. If the review time needed to process your application exceeds the time listed in the **Consolidated Fee Schedule (Table 2 or 9)**, you will be charged for each additional hour of review;
- Additional Engineering Review Fee. Specific projects or activities listed in the **Consolidated Fee Schedule (Table 2 or 9)** are subject to a fee; and
- Major NSR Review Fee. Specific projects or activities are subject to the fee listed in the **Consolidated Fee Schedule (Table 2 or 9).**

PERMIT APPLICATION / NEW SOURCE REVIEW

BACT IMPACT ANALYSIS WORKSHEET

Facility Name: _____

Date: _____

CONTROL ALTERNATIVE	EMISSIONS [lbs/hr] & [tons/yr]	EMISSIONS REDUCTION ① [tons/yr]	INSTALLED CAPITAL COST ② [\$]	TOTAL ANNUALIZED COST ③⑦ [\$]	AVERAGE COST EFFECTIVENESS OVER BASELINE ④ [\$/ton]	INCREMENTAL COST EFFECTIVENESS ⑤ [\$/ton]	ENERGY INCREASE OVER BASELINE ⑥ [MMBtu/yr]	TOXICS IMPACT [Yes/No]	ADVERSE ENVIRONMENTAL IMPACT [Yes/No]
1)									
2)									
3)									
4)									
5) Uncontrolled Baseline (worst case - no controls)									

① Emissions reduction over baseline control level.

② Installed capital cost relative to baseline.

③ Total annualized cost (capital, direct, and indirect) of purchasing, installing, and operating the proposed control alternative. A capital recovery factor approach using a real interest rate (i.e., absent inflation) is used to express capital costs in present-day annual costs.

④ Average cost effectiveness over baseline is equal to total annualized cost for the control option divided by the emissions reductions resulting from the uncontrolled baseline.

⑤ The optional incremental cost effectiveness criterion is the same as the average cost effectiveness criteria except that the control alternative is considered relative to the next most stringent alternative rather than the baseline control alternative.

⑥ Energy impacts are the difference in total project energy requirements with the control alternative uncontrolled baseline expressed in equivalent millions of Btus per year.

⑦ Assumptions made on catalyst life may have a substantial affect upon cost effectiveness.

Notes:

The number of alternatives to be evaluated will vary depending on application.

Values for each variable should be provided as they are applicable. Use N/A if not applicable.

Emission rates are the expected or predicted emission rates.

Calculations should provide for a range of alternatives.

Emissions reduction should use estimated efficiency if actual efficiency is unknown - should so state.

Attach worksheets as necessary to substantiate above values.
