

PUBLIC NOTICE

Notice to the public is hereby given that the Southwest Clean Air Agency (SWCAA) is providing a 30 day public comment period for the preliminary determination to issue Air Discharge Permit 18-3266 to the Port of Longview. This preliminary determination approves the installation of two new portable baghouses, relocation of an existing baghouse, and modification of existing portable material handling equipment. All affected equipment operates in support of bulk material handling and storage operations located at 10 Port Way in Longview, Cowlitz County, Washington. The proposed action will not change the nature of existing operations and does not involve any excavation, road construction or building construction. There will be no significant impact on any media other than air. Emissions to the ambient air will be minimized through the use of process enclosure and high efficiency filtration. The existing facilitywide particulate matter (PM₁₀) emission limit will increase by 2.18 tpy to 25.90 tpy.

Copies of the preliminary Air Discharge Permit and associated Technical Support Document are available for review at 11815 NE 99th Street, Suite 1294, Vancouver, Washington, Monday through Friday from 7:00 a.m. to 5:30 p.m. Electronic copies are available for review in the permit section of SWCAA's internet website (www.swcleanair.org/permits/publiccomments.asp). This material will be made available in other media, if necessary. All written or oral comments must be received by SWCAA within thirty (30) days after the date of publication. Final action by SWCAA to approve, modify, or deny the proposal will be taken within ten (10) days after the close of the comment period. If there is a demonstrated significant public interest, a public meeting may be held at the close of the public comment period.
