

PUBLIC NOTICE

Notice is hereby given that the Southwest Clean Air Agency (SWCAA) is providing a forty-five (45) day public comment period to the public, Affected States, and EPA for the preliminary determination to issue Air Discharge Permit (ADP) 21-3452 to North Pacific Paper Company. This preliminary determination is to approve installation of recovered fiber pulping line at a facility located at 3401 Industrial Way in Longview, Washington.

An extended public comment period is being provided to meet a "substantially equivalent" permitting process under WAC 173-401-720(1)(e). This comment period applies to ADP 21-3452 only. Once the public comment period has ended and after resolving any comments, SWCAA will issue a final ADP as promptly as possible. SWCAA expects a subsequent request by the facility to revise Air Operating Permit (AOP) SW18-22-R0 to incorporate the terms of ADP 21-3452 as an administrative amendment consistent with WAC 173-401-720(3)(a). There will be no additional public comment period provided on the revised Air Operating Permit.

Copies of the preliminary ADP and associated Technical Support Document are available for review at 11815 NE 99th Street, Suite 1294, Vancouver, Washington 98682-2322, Monday through Friday from 7:00 a.m. to 5:30 p.m. Electronic copies are available for review in the "Air Permits" SWCAA's website, <http://www.swcleanair.org>. This material will be made available in other media, if necessary. All written or oral comments must be received by SWCAA within forty-five (45) calendar days after the date of publication. If there is a demonstrated significant public interest, a public hearing may be held.
