

## **PUBLIC NOTICE**

Notice to the public is hereby given that the Southwest Clean Air Agency (SWCAA) is providing a thirty (30) day public comment period for the preliminary determination to issue Air Discharge Permit 25-3713 to Tristar Transload PNW, Inc. This preliminary determination approves the use of three new butane transloaders at the existing facility located at 3702 NW Gateway Avenue, Vancouver, WA 98660, as well as at the new facility located at 1309 West 11th Street, Vancouver, WA 98660. Tristar is currently permitted for a throughput of 600,000 barrels per year of each product; therefore, this permitting action will not lead to an increase in propane or butane emissions. The new transloader engines will result in an increase of 0.001 tons of SO<sub>2</sub> per year.

Copies of the preliminary Air Discharge Permit and associated Technical Support Document are available for review at 5101 NE 82<sup>nd</sup> Ave., Suite 102, Vancouver, Washington 98662, Monday through Friday from 7:00 a.m. to 5:30 p.m. Electronic copies are available for review in the permit section of SWCAA's website, <https://www.swcleanair.gov/permits/publiccomments.asp>. This material will be made available in other media, if necessary. All written or oral comments must be received by SWCAA within thirty (30) calendar days after the date of publication. A public hearing may be held if SWCAA determines that significant public interest exists. In the event a public hearing is held, the public comment period will be extended beyond the public hearing date.
