

## PUBLIC NOTICE

Notice is hereby given that the Southwest Clean Air Agency (SWCAA) is providing a forty-five (45) day public comment period to the public, Affected States, and EPA for the preliminary determination to issue Air Discharge Permit (ADP) 18-3302 to the City of Vancouver Westside Wastewater Treatment Plant. This preliminary determination is to approve installation and operation of a Mercury Control Module and a mist eliminator to the control systems of the Fluidized Bed Incinerator (FBI), modify sludge feed rate, moisture monitoring requirements, and metals limits for the FBI, modify emission limits and operational parameters for the Air Treatment System, and approve installation and operation of two diesel-fired emergency pump engines. This facility is located at 4650 SE Columbia Way Vancouver, WA 98661.

The extended public comment period is being provided to meet a "substantially equivalent" permitting process under WAC 173-401-720(1)(e). This comment period applies to ADP 18-3302 only. Once the public comment period has ended and after resolving any comments, SWCAA will issue a final ADP as promptly as possible. In addition, SWCAA expects a request by the facility to revise Air Operating Permit (AOP) SW97-1-R2 under an administrative amendment per WAC 173-401-720 to incorporate the terms of ADP 18-3302, to correct typographical errors, and identify more frequent monitoring or reporting requirements. There will be no additional public comment period provided on the revised Air Operating Permit.

Copies of the preliminary ADP and associated Technical Support Document are available for review at 11815 NE 99th Street, Suite 1294, Vancouver, Washington 98682-2322, Monday through Friday from 7:00 a.m. to 5:30 p.m. Electronic copies are available for review in the "Air Permits" SWCAA's website, <http://www.swcleanair.org>. This material will be made available in other media, if necessary. All written or oral comments must be received by SWCAA within forty-five (45) calendar days after the date of publication. If there is a demonstrated significant public interest, a public hearing may be held.
