1. Hire an AHERA certified Inspector to survey the structure and identify any asbestos containing material (ACM). A list can be found at swcleanair.org.

2. Hire a certified asbestos abatement contractor to remove and properly dispose of the ACM from the structure. A list can be found at swcleanair.org.

3. Has all ACM been completely removed from the structure?

4. Complete the SWCAA Notice of Demolition, available from SWCAA (also provided in the Fire Training Packet from SWCAA). Make sure to obtain all other additional permits, licenses or documents needed for this demolition project from the proper local, state or federal agencies.

5. If the structure will be used for fire training then go to the Fire Dept. that will be performing the training and complete a Fire Dept. Training Request Form for the Structure. (for conventional non fire demolition skip step #5)

6. Return the SWCAA Notice of Demolition with a copy of the asbestos inspection report, a completed Fire Dept. Training Request Form (if applicable) and $65.00 demolition fee to SWCAA for approval and verification.

7. The Fire Training and/or demolition can take place 10 days from the date the completed Fire Training Request, demolition notice and fee are received and approved by SWCAA.

ALL DEMOLITION AND FIRE TRAINING FORMS MAY BE Copied AS NEEDED OR ARE AVAILABLE FROM THE SOUTHWEST CLEAN AIR AGENCY
