

April 3, 2023

Mr. Don Sorensen, Vice President Harold Sorensen Trucking, Inc. 112 Plomondon Road Toledo, WA 98591

Subject: Final Air Discharge Permit / Nonroad Engine Permit for New Rock Crushing Equipment

Dear Mr. Sorensen:

A final determination to issue Air Discharge Permit / Nonroad Engine Permit (ADP/NEP) 23-3573 has been completed for ADP/NEP Application CO-1067 pursuant to Section 400-110(4) of the General Regulations for Air Pollution Sources of the Southwest Clean Air Agency (SWCAA). Public notice for ADP/NEP Application CO-1067 was published in the permit section of SWCAA's internet website on March 15, 2023. SWCAA did not receive a request for a public comment period in response to the public notice and has concluded that significant public interest does not exist for this determination. Therefore, a public comment period will not be provided for this permitting action. Electronic copies of ADP/NEP 23-3573 and the associated Technical Support Document (TSD) are available for public review in the "Recent Air Discharge Permits" section under the "Air Permits" link on SWCAA's website (*http://www.swcleanair.gov*). Original copies are enclosed for your files.

ADP 23-3573 may be appealed directly to the Pollution Control Hearings Board (PCHB) at P.O. Box 40903, Olympia, Washington 98504-0903 within 30 days of receipt as provided in RCW 43.21B.

If you have any comments, or desire additional information, please contact me or Vannessa McClelland at (360) 574-3058, extension 129.

Sincerely, Uri Papish

Uri Papish Executive Director

No.	Equipment/Activity	Control Equipment/Measure
1	Powerscreen 600 Jaw Crusher	High Pressure Wet Suppression
2	Powerscreen 1300 Cone Crusher	High Pressure Wet Suppression
3	Powerscreen 2100x Aggregate Screen	High Pressure Wet Suppression
4	Haul Roads and Conveyors	Wet Suppression
5	Nonroad Engine	Ultra-low Sulfur Diesel,
	Powerscreen Jaw Crusher - Scania	EPA Tier 4 Certification
6	Nonroad Engine	Ultra-low Sulfur Diesel,
	Powerscreen Cone Crusher - Scania	EPA Tier 4 Certification
7	Nonroad Engine	Ultra-low Sulfur Diesel,
	Powerscreen Aggregate Screen - Caterpillar	EPA Tier 4 Certification
8	Diesel Engine Generator – 174 hp Isuzu	Ultra-low Sulfur Diesel,
		EPA Tier 4 Certification

1. Equipment/Activity Identification

2. Permit Requirements

The following tables detail the specific requirements of this Air Discharge Permit (ADP). In addition to the requirements listed below, equipment at this facility may be subject to other federal, state, and local regulations. The requirement number is identified in the left-hand column. The text of the permit requirement is contained in the middle column. The emission unit, equipment, or activity to which the permit requirement applies is listed in the right-hand column.

This ADP/NEP supersedes ADP/NEP 21-3499 in its entirety.

Emission Limits

Req. No.	Emission Limits	Equipment/ Activity ID No.
1.	Combined emissions from aggregate crushing and handling operations (crushing,	1 - 4
	screening, conveying, and haul roads) must not exceed:	
	Pollutant Emission Limit	
	PM 25.86 tpy	
	PM ₁₀ 7.32 tpy	
	PM _{2.5} 1.10 tpy	
	Annual emissions must be calculated from actual material throughput consistent with the methodology in Section 6 of the Technical Support Document (TSD) for this ADP.	

Req. No.	Emission Limits	Equipment/ Activity ID No.
2.	Emissions from the Isuzu Generator Engine must not exceed:	8
	PollutantEmission Limit NO_X 0.16 tons per year CO 2.00 tons per year PM_{10} 0.0054 tons per year	
	Annual emissions must be calculated from the number of hours the unit operated consistent with the methodology in Section 6 of the TSD for this Permit.	
3.	Visible emissions from crushing and conveying equipment must not exceed zero percent (0%) opacity for more than three (3) minutes in any one-hour period, as determined in accordance with SWCAA Method 9 (See Appendix A of SWCAA 400).	1 - 3
4.	Visible emissions from haul roads must not exceed ten percent (10%) opacity for more than three (3) minutes in any one-hour period, as determined in accordance with SWCAA Method 9 (See Appendix A of SWCAA 400).	4
5.	Visible emissions from diesel engines operating in support of crushing and handling operations must not exceed five percent (5%) opacity for more than three (3) minutes in any one-hour period, as determined in accordance with SWCAA Method 9, except during periods of startup.	5-8
	For the purposes of this requirement, a startup period ends when the earlier of the following operating events occurs:(a) The engine has reached normal operating temperature; or(b) The engine has been operating for 15 minutes.	

Operating Limits and Requirements

Req. No.	Operating Limits and Requirements	Equipment/ Activity ID No.
6.	6. Reasonable precautions must be taken at all times to prevent and minimize fugitive emissions from plant operations.	
7.	Odors from the facility must not unreasonably interfere with any other property owner's use and enjoyment of the property. Recognized good practice and procedures must be used to reduce odors to a reasonable minimum.	Facility-wide
8.	Emission units and activities identified in this ADP must be maintained and operated in total and continuous conformity with the conditions identified in this ADP. SWCAA reserves the right to take any and all appropriate action to maintain the conditions of this ADP, including directing the facility to cease operations until corrective action can be completed.	Facility-wide

Req. No.	Operating Limits and Requirements	Equipment/ Activity ID No.
9.	Each pollution control device must be operated whenever the processing equipment served by that air pollution control device is in operation. Control devices must be operated and maintained in accordance with the manufacturer's specifications. Furthermore, air pollution control devices must be operated in a manner that minimizes emissions.	1-3
10.	Material handling points, including, but not limited to, conveyor transfer points, aggregate storage piles, and haul roads, must be watered as necessary to control fugitive dust emissions.	1-4
11.	The Permittee must notify SWCAA at least 10 business days in advance of relocating approved equipment and must submit operational information (production quantities, hours of operation, location of nearest neighbor, etc.) sufficient to demonstrate that the proposed operation will comply with the emission standards for a new source, and will not cause a violation of applicable ambient air quality standards, and if in a nonattainment area, will not interfere with scheduled attainment of ambient standards.	1-8
12.	Each rock crusher and aggregate screen must be equipped with a high-pressure water spray system or other wet suppression system reviewed and approved by SWCAA to provide equivalent or superior control of particulate matter emissions. Each high- pressure spray system must be capable of maintaining an operating pressure of 80 psig or greater and must maintain 80 psig or greater during operation. A functional pressure gauge must be maintained onsite and a connection point provided for the purpose of demonstrating compliance with the minimum pressure requirement for high pressure spray systems.	1-3
13.	Each pollution control device (e.g., water spray or fog systems) must be operated whenever the processing equipment served by that control device is in operation. Control devices must be operated and maintained in accordance with the manufacturer's specifications. Furthermore, control devices must be operated in a manner that minimizes emissions.	1-3
14.	Additional wet suppression must be provided as necessary to control fugitive dust from haul roads, crushing and material handling equipment in the event that process changes or weather patterns result in insufficient water application to control fugitive dust from plant operations.	1-4
15.	Each diesel engine must only be fired on #2 diesel or better. The sulfur content of the fuel fired in the diesel engines must not exceed 0.0015% by weight (15 ppm). A fuel certification from the fuel supplier or test results using an appropriate method listed in 40 CFR 60.17 may be used to comply with this requirement.	5-8
16.	Each diesel engine must be equipped with a nonresettable time totalizer to measure the number of hours each engine operates.	5-8
17.	The Isuzu Generator Engine must not be operated more than 2,800 hours per year.	8

MIOIIIC	Aonitoring and Recordkeeping Requirements			
Req. No	Monitoring and Recordkeep	ing Requirements	Equipment/ Activity ID No.	
18.	With the exception of data logged by a comput record required by this ADP must include the making the record entry.		Facility-wide	
19.	All records required by this ADP must be kept f three (3) years and must be maintained in a for SWCAA representatives.		Facility-wide	
20.	Excess emissions and upset conditions must be re	corded for each occurrence.	Facility-wide	
21.	 The following information must be collected, recaand readily available on-site for inspection: (a) Quantity and size of material throughput (b) Hours of engine operation (c) Visual inspection of spray/fog nozzles (d) Maintenance of spray/fog nozzles (e) Date and location of equipment relocation (f) Air quality related complaints (g) Fuel sulfur content of diesel engine fuel 	orded at the intervals specified below, Recorded monthly for each worksite; Recorded annually for each diesel engine for each worksite; Recorded for each occurrence; Recorded for each occurrence; Recorded for each occurrence; and Recorded for each occurrence; and Recorded for each fuel delivery. A fuel certification from the fuel supplier or test results using an appropriate method listed in 40 CFR 60.17 may be used to comply with this requirement	1-8	

Monitoring and Recordkeeping Requirements

Emission Monitoring and Testing Requirements

Req. No.	Emission Monitoring and Testing Requirements	Equipment/ Activity ID No.
22.	The Permittee must conduct initial emission testing of all rock crushing equipment listed in this ADP subject to Subpart OOO that has not been previously tested. Emissions testing must be conducted within 60 days after permit issuance pursuant to Appendix A of this ADP and the requirements of 40 CFR 60, Subpart OOO "Standards of Performance for Nonmetallic Mineral Processing Plants."	2

Reporting Requirements

Req. No.	Reporting Requirements	Equipment/ Activity ID No.
23.	Upset conditions must be reported to SWCAA as soon as possible after discovery.	Facility-wide
	Outside of normal business hours, upset conditions may be reported by email, fax, or leaving a telephone message with SWCAA.	

Req. No.	Reporting Requirements	Equipment/ Activity ID No.
24.	 Excess emissions must be reported to SWCAA as follows: (a) As soon as possible, but no later than twelve (12) hours after discovery for emissions that represent a potential threat to human health or safety; (b) As soon as possible, but no later than forty-eight (48) hours after discovery for emissions which the Permittee wishes to claim as unavoidable pursuant to SWCAA 400-107(1); and (c) No later than thirty (30) calendar days after the end of the month of discovery for all other excess emissions. 	Facility-wide
25.	Deviations from permit conditions must be reported no later than 30 days after the end of the month during which the deviation is discovered.	Facility-wide
26.	All air quality related complaints received by the Permittee regarding activities controlled by the Permittee must be reported to SWCAA within three calendar days of receipt. Complaint reports must include the date and time of the complaint, the name and contact information (if available) for the complainant, the nature of the complaint, and any actions taken by the Permittee to address the complaint.	Facility-wide
27.	 The following emission-related information must be reported to SWCAA by March 15th for the previous calendar year: (a) Quantity and size of material crushed and blasted at each worksite; (b) Average length of unpaved haul road controlled by the Permittee at each worksite; (c) Hours of engine operation for each diesel engine used in support of crushing operations at each worksite; and (d) Air emissions of criteria air pollutants, volatile organic compounds, toxic air pollutants (TAPs), and hazardous air pollutants (HAPs). 	1-8
28.	The results of source emissions testing conducted in accordance with Appendix A must be reported to SWCAA within 45 days of test completion.	1-8

3. General Provisions

No.	General Provisions	
А.	For the purpose of ensuring compliance with this ADP, duly authorized representatives of SWCAA must be permitted access to the Permittee's premises and the facilities being constructed, owned, operated and/or maintained by the Permittee for the purpose of inspecting said facilities. These inspections are required to determine the status of compliance with this ADP and applicable regulations and to perform or require such tests as may be deemed necessary.	
В.	The provisions, terms, and conditions of this ADP bind the Permittee, its officers, directors, agents, servants, employees, successors and assigns, and all persons, firms, and corporations acting under or for the Permittee.	
C.	The requirements of this ADP survive any transfer of ownership of the source or any portion thereof.	
D.	This ADP must be posted conspicuously at or be readily available near the source.	

No.	General Provisions	
E.	Approval and associated ADP requirements for any new or modified equipment will be invalid, in whole or in part, if installation or modification of the affected equipment has not commenced within eighteen (18) months from date of issuance, is discontinued for a period of eighteen (18) months or more, or is not completed within a reasonable time.	
F.	This ADP does not supersede requirements of other Agencies with jurisdiction and further, this ADP does not relieve the Permittee of any requirements of any other governmental Agency. In addition to this ADP, the Permittee may be required to obtain permits or approvals from other agencies with jurisdiction.	
G.	Compliance with the terms of this ADP does not relieve the Permittee from the responsibility of compliance with SWCAA General Regulations for Air Pollution Sources, previously issued Regulatory Orders, RCW 70A.15, Title 173 WAC or any other applicable emission control requirements, nor from the resulting liabilities and/or legal remedies for failure to comply.	
H.	If any provision of this ADP is held to be invalid, all unaffected provisions of the ADP will remain in effect and be enforceable.	
I.	No change in this ADP will be made or be effective, except as may be specifically set forth by written order of SWCAA upon written application by the Permittee for the relief sought.	
J.	SWCAA may, in accordance with RCW 70A.15, impose such conditions as are reasonably necessary to assure the maintenance of compliance with the terms of this ADP, the Washington Clean Air Act, and the applicable rules and regulations adopted under the Washington Clean Air Act.	

ADP/NEP 23-3573 - Appendix A Emission Testing Requirements Rock Crushers / Aggregate Screens

1. Introduction:

The purpose of this emission testing requirement is to demonstrate compliance with the visual emissions limitations of this permit and 40 CFR 60, Subpart OOO "Standards of Performance for Nonmetallic Mineral Processing Plants."

2. Testing Requirements:

- a. An initial emissions test must be conducted for all rock crushing equipment listed in this permit subject to Subpart OOO that has not been previously tested pursuant to 40 CFR 60.8 and 60.675. Emissions testing must be conducted within 60 days after permit issuance. If an affected unit is not in SWCAA's jurisdiction within this time frame or leaves SWCAA's jurisdiction within this time frame, the emission testing must be conducted within 60 days of coming into SWCAA's jurisdiction.
- b. A comprehensive test plan must be submitted to SWCAA for review and approval a minimum of 10 business days prior to testing.
- c. SWCAA personnel must be informed of the proposed test date and location at least 5 business days prior to testing so that a representative may be present during testing.
- d. Testing must include all constituents identified below. The identified sampling methods must be used unless alternate methods are approved by SWCAA in advance of the emission testing. A minimum of 30 minutes of observations must be conducted as required by 40 CFR 60.675(c)(3).

Constituents to be measured:		Test Methods or Equivalent:
(1)	Opacity	EPA Method 9

e. Process Points to Be Tested:

- (1) Affected rock crushers and aggregate screens; and
- (2) Each conveyor transfer point associated with affected emission units.
- f. Opacity observation data must be reduced and analyzed using the protocols in EPA Method 9 and SWCAA Method 9. Compliance must be determined by comparing the reduced opacity data with the visible emission limits contained in this permit and the New Source Performance Standard for Nonmetallic Mineral Processing Plants (40 CFR 60.670 et seq. (Subpart OOO)).

3. Source Operation:

- a. A complete record of production related parameters, including production rate, size of product being processed, startups, shutdowns, and adjustments must be kept during emissions testing to correlate operations with emissions and must be recorded in the test results report.
- b. Source operations during the emissions test must be representative of maximum intended operating conditions.

ADP/NEP 23-3573 - Appendix A Emission Testing Requirements Rock Crushers / Aggregate Screens

4. Reporting Requirements:

A final emission test report must be prepared and submitted to SWCAA within 45 calendar days of test completion. Unless otherwise directed by SWCAA, a single hard copy of the report and an electronic copy (e.g., portable document format) of the report must be submitted to each agency. Each report must include:

- (1) A description of the source, including manufacturer, model number and design capacity of the equipment, and the location of the sample ports or test locations;
- (2) Time and date of the test and identification and qualifications of the personnel involved;
- (3) A summary of results, reported in units and averaging periods consistent with the applicable emission standard or limit;
- (4) A summary of control system or equipment operating conditions;
- (5) A summary of production related parameters;
- (6) A description of the test methods or procedures used, including all field data, quality assurance/quality control procedures and documentation;
- (7) A description of the analytical procedures used, including all laboratory data, quality assurance/quality control procedures and documentation;
- (8) Copies of field data and example calculations;
- (9) Chain of custody information;
- (10) Discussion of any abnormalities associated with the results; and
- (11) A statement signed by the senior management official of the testing firm certifying the validity of the source test report.

5. Changes to Testing Requirements:

The source test must be conducted as specified in the sections above. The Permittee may submit a written request to SWCAA for approval of minor modifications to the requirements above or the testing schedule. Upon review of the request and in accordance with EPA delegation, SWCAA will inform the Permittee in writing of any approved modifications.
