Re: Final Title V Renewal Permit for Clark PU – River Road Generating Plant

Dear Mr. Toland:

The Southwest Clean Air Agency (SWCAA) is issuing final Air Operating Permit SW99-9-R3 to Clark Public Utilities - River Road Generating Plant. The permit is a renewal permit.

A copy of the final Air Operating Permit and associated Basis Statement accompany this letter. Electronic copies of each document will also be available on SWCAA's website at www.swcleanair.org.

If you have any questions or comments, please contact me at (360) 574-3058 ext. 126.

Sincerely,

Wess Safford
Air Quality Engineer

Terms not otherwise defined in this permit have the meaning assigned to them in the referenced regulations.
II. REGULATORY BASIS

This Air Operating Permit (AOP), hereafter referred to as the "Permit", is authorized under the procedures established in WAC 173-401 and Title V of the Federal Clean Air Act (FCAA). The terms and conditions of this permit describe the emissions limitations, operating requirements, ambient monitoring, recordkeeping requirements, and reporting frequencies for the permitted source. Permit terms and conditions are divided into the following categories: General Terms and Conditions, Operating Terms and Conditions, Monitoring Terms and Conditions, Recordkeeping Terms and Conditions, and Reporting Terms and Conditions. As used in this Permit, "term", "condition", "standard", and "requirement" have the same meaning as "applicable requirement" specified under 40 Code of Federal Regulations (CFR) 70.2 and WAC 173-401-200.

The Permit is intended to contain a comprehensive list of the local, state, and federal air pollution regulations and standards applicable to the Permittee's facility and to assure and provide for certification of compliance with those requirements. Sections V through IX describe the applicable requirements and cite the originating local, state, or federal regulation or requirement. Federal requirements may be direct (e.g., FCAA or CFR citation) or established under the Washington State Implementation Plan (SIP). Each citation in the table also includes one or two effective dates of the cited regulation. Where there are two dates for the same regulatory citation, the underlying requirement is substantially the same, but the date of the regulation used for enforcement purposes would be different (e.g., federally enforceable versus SWCAA enforceable).

SWCAA is the primary authority for enforcement of all requirements listed in the Permit (federal, state, and local). However, EPA and private citizens may also take enforcement actions under the Permit for those requirements that are federally enforceable; federal regulations, regulations that have a SIP date, and terms of ADPs are federally enforceable. Rules, regulations, and permits that are not SIP approved or federally promulgated are not federally enforceable.

The following table lists the title and effective dates of regulations applicable to the facility:

### III. EMISSIONS UNIT IDENTIFICATION

#### ID No.  Unit Name  Unit Description

**EU1**  Combustion Turbine  One General Electric model 7A1PFA28-1 natural gas fired combustion turbine (serial #296845) configured with inlet fogging. The combustion turbine is designed to produce approximately 179 MW of electrical power. The combustion turbine operates in conjunction with an unfired heat recovery steam generator (HRSG) that drives a steam turbine. The steam turbine is designed to produce approximately 69 MW of electrical power. Emissions from the combustion turbine consist of NOx, CO, SO2, PM, VOC, NH3, HAPs, and TAPs. Emissions of nitrogen oxides (NOx) and carbon monoxide (CO) from the combustion turbine are controlled by a selective catalytic reduction (SCR) system and an oxidation catalyst, respectively.

**EU2**  Startup Boiler  One Nebraska Boiler model NS-E-76SH (serial number D-3570) natural gas fired boiler rated at 70,000 pounds of steam per hour. The startup boiler has a nominal heat input rating of 103.5 million British thermal units per hour (MMBtu/hr). Emissions from the startup boiler consist of NOx, CO, SO2, PM, VOC, and TAPs.

IV. PERMIT PROVISIONS

P1. Credible Evidence

40 CFR 51.212
40 CFR 52.12, 40 CFR 52.33
40 CFR 60.11

For the purposes of submitting compliance certifications or establishing whether a violation of any term or condition of this permit has occurred or is occurring, nothing shall preclude the use, including the exclusive use, of any credible evidence or information, relevant to whether the permittee would have been in compliance with a specific term or condition if the appropriate performance or compliance test or procedure would have been performed.

P2. Insignificant Emission Unit - Restriction

WAC 173-401-530(6)

Any emissions unit or activity that qualifies as insignificant solely on the basis of provisions in WAC 173-401-530(1)(a) shall not exceed the emissions thresholds specified in WAC 173-401-530(4) until this permit is modified pursuant to WAC 173-401-725.

P3. Permit Duration

WAC 173-401-610

This permit shall be valid for a fixed term of 5 years.

P4. Confidentiality of Records and Information

WAC 173-401-500(5)
WAC 173-401-620(2)(e)

SWCAA 400-270

The permittee is responsible for clearly identifying information that is considered proprietary and confidential prior to submittal to SWCAA. Requests for proprietary and confidential information shall be released only after legal opinion by SWCAA's legal counsel, and notice to the permittee of the intent to release or deny the release of information.

In the case where the permittee has submitted information to SWCAA under a claim of confidentiality, SWCAA may also require the source to submit a copy of such information directly to the EPA Administrator.
Upon request, the permittee shall also furnish to the permitting authority copies of records required to be kept by the permittee or, for information claimed to be confidential, the permittee may furnish such records directly to the EPA Administrator along with a claim of confidentiality. Permitting authorities shall maintain confidentiality of such information in accordance with RCW 70.94.205.

P5. Standard Conditions

(a) *Duty to comply.* The permittee must comply with all conditions of this Chapter 401 permit. Any permit noncompliance constitutes a violation of Revised Code of Washington (RCW) Chapter 70.94 and, for federally enforceable provisions, a violation of the FCAA. Such violations are grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

(b) *Need to halt or reduce activity not a defense.* It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

(c) *Permit actions.* This permit may be modified, revoked, reopened, and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

(d) *Property rights.* This permit does not convey any property rights of any sort, or any exclusive privilege.

(e) *Duty to provide information.* The permittee shall furnish to the permitting authority, within a reasonable time, any information that the permitting authority may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit, or to determine compliance with the permit. Upon request, the permittee shall also furnish to the permitting authority copies of records required to be kept by the permittee or, for information claimed to be confidential, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality. Permitting authorities shall maintain confidentiality of such information in accordance with RCW 70.94.205.

(f) *Permit fees.* The permittee shall pay fees in accordance with RCW 70.94.162 as a condition of this permit in accordance with the permitting authority's fee schedule. Failure to pay fees in a timely fashion shall subject the permittee to civil and criminal penalties as prescribed in RCW 70.94.430 and 70.94.431.

(g) *Emission trading.* No permit revision shall be required, under any approved economic incentives, marketable permits, emissions trading and other similar programs or processes for changes that are provided for in this permit.

(h) *Severability.* If any provision of this permit is held to be invalid, all unaffected provisions of the permit shall remain in effect and be enforceable.

(i) *Permit appeals.* This permit or any conditions in it may be appealed only by filing an appeal with the Pollution Control Hearings Board and serving it on the permitting authority within thirty days of receipt of the permit pursuant to RCW 43.21B.310. This provision for appeal in this section is separate from and additional to any federal rights to petition and review under § 505(b) of the FCAA.

(j) *Permit continuation.* This permit and all terms and conditions contained herein shall not expire until the renewal permit has been issued or denied if a timely and complete application has been submitted. An application shield granted pursuant to WAC 173-401-705(2) shall remain in effect until the renewal permit has been issued or denied if a timely and complete application has been submitted.
P6. Federally Enforceable Requirements WAC 173-401-625
(a) All terms and conditions in an air operating permit, including any provisions designed to limit a source's potential to emit, are enforceable by the Administrator and citizens under the FCAA, except as indicated in paragraph (b) below.
(b) Any terms and conditions included in this permit that are not required under the FCAA or under any of its applicable requirements are not federally enforceable under the FCAA. Terms and conditions so designated are not subject to the EPA and affected states review requirements of WAC 173-401-700 through WAC 173-401-820. Terms that are SWCAA enforceable only are marked as "local only".

P7. Permit Shield WAC 173-401-640
Compliance with the conditions of this permit shall be deemed compliance with all applicable requirements that are specifically identified in this permit as of the date of permit issuance. Nothing in this permit shall alter or affect the following:
(a) The provisions of Section 303 of the FCAA (emergency orders), including the authority of the Administrator under that section;
(b) The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance;
(c) The applicable requirements of the acid rain program, consistent with Section 408(a) of the FCAA;
(d) The ability of EPA to obtain information from a source pursuant to Section 114 of the FCAA; and
(e) The ability of the permitting authority to establish or revise requirements for the use of reasonably available control technology (RACT) as defined in RCW 70.94.

P8. Emergency Provision WAC 173-401-645
An "emergency" as defined in WAC 173-401-645(1) shall constitute an affirmative defense to an action brought for noncompliance with technology-based emission limitations. The burden of proof lies with the permittee. The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:
(a) An emergency occurred, and that the permittee can identify the causes(s) of the emergency;
(b) The permitted facility was at the time being properly operated;
(c) During the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
(d) The permittee submitted notice of the emergency to the permitting authority within two working days of the time when emission limitations were exceeded due to the emergency or shorter periods of time specified in an applicable requirement. This notice fulfills the requirement of WAC 173-401-615(3)(b) unless the excess emissions represent a potential threat to human health and safety. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

P9. Permit Expiration – Application Shield WAC 173-401-705(2)
WAC 173-401-710(3)
Permit expiration terminates the source's right to operate unless a timely and complete renewal application has been submitted consistent with WAC 173-401-710(1) and WAC 173-401-500. All terms and conditions of the permit shall remain in effect after the permit expires if a timely and complete permit application has been submitted. Operation under the terms and conditions of the expired permit will be allowed until SWCAA takes final action on the renewal application.
P10. Permit Revocation

WAC 173-401-710(4)
The permitting authority may revoke a permit only upon the request of the permittee or for cause. The permitting authority shall provide at least thirty days written notice to the permittee prior to revocation of the permit or denial of a permit renewal application. Such notice shall include an explanation of the basis for the proposed action and afford the permittee an opportunity to meet with the permitting authority prior to the authority's final decision. A revocation issued under this section may be issued conditionally with a future effective date and may specify that the revocation will not take effect if the permittee satisfies the specified conditions before the effective date.

P11. Reopening for Cause

WAC 173-401-730
This permit shall be reopened and revised under any of the following circumstances:

(a) Additional applicable requirements become applicable to a major air operating permit source with a remaining permit term of 3 or more years. Such a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions have been extended pursuant to WAC 173-401-620(2)(j);
(b) Additional requirements (including excess emissions requirements) become applicable to an affected source under the acid rain program. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit;
(c) The permitting authority or Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit; or
(d) The Administrator or the permitting authority determines that the permit must be revised or revoked to assure compliance with the applicable requirements.

Proceedings to reopen and issue this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of the permit for which cause to reopen exists. Reopenings under this section shall not be initiated before a notice of such intent is provided to the AOP source by the permitting authority. Such notice shall be made at least 30 days in advance of the date that the permit is to be reopened, except that the permitting authority may provide a shorter time period in the case of an emergency.

P12. Changes Not Requiring Permit Revision / Off Permit Changes

WAC 173-401-722
WAC 173-401-724
The Permittee may make changes as described in WAC 173-401-722 and WAC 173-401-724 without revising this Permit, provided that the changes satisfy the criteria set forth in those sections, including the requirements to notify SWCAA and EPA. Changes made by the Permittee under WAC 173-401-724 do not qualify for a permit shield.

P13. Excess Emissions

SWCAA 400-107
Excess emissions due to startup or shutdown conditions or due to scheduled maintenance shall be considered unavoidable provided the source reports as required under by SWCAA 400-107(1) and adequately demonstrates that the excess emissions could not have been prevented or avoided. This provision does not apply to federal standards.
Excess emissions due to upsets shall be considered unavoidable provided that the permittee reports as soon as possible but no later than 48 hours after discovery, and adequately demonstrates that:

(a) The event was not caused by poor or inadequate design, operation, or maintenance, or any other reasonably preventable conditions;

(b) The event was not of a recurring pattern indicative of inadequate design, operation, or maintenance;

(c) The operator took immediate and appropriate corrective action in a manner consistent with good air pollution control practice for minimizing emissions during the event, taking into account the total emissions impact of the corrective action, including slowing or shutting down the emission unit as necessary to minimize emissions, when the operator knew or should have known that an emission standard or permit condition was being exceeded; and

(d) The owner or operator(s) actions in response to the excess emissions were documented by properly signed, contemporaneous operating logs, or other relevant evidence.

V. GENERAL TERMS AND CONDITIONS

G1. Certification of Submittals

All application forms, reports, and compliance certifications must be certified by a responsible official. Certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information contained in the submittal are true, accurate, and complete.

G2. Duty to Supplement or Correct Application

The permittee, upon becoming aware that relevant facts were omitted, or incorrect information was submitted in a permit application, shall promptly submit such supplementary facts or corrected information. In addition, the permittee shall provide additional information as necessary to address any requirements that become applicable to the source after the date it filed a complete application but prior to release of a draft permit.

G3. Inspection and Entry

The permittee shall allow inspection and entry, upon presentation of credentials and other documents as may be required by law, by the permitting authority or an authorized representative to perform the following:

(a) Enter upon the permittee's premises where an air operating permit source is located, or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;

(b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

(c) Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and

(d) As authorized by SWCAA 400-105 and the FCAA, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

G4. Schedule of Compliance

The permittee shall continue to comply with all applicable requirements with which the source is currently in compliance, and meet on a timely basis any applicable requirements that become effective during the permit term.
G5. Permit Renewal  
WAC 173-401-710(1)
The permittee shall submit a complete permit renewal application to SWCAA no later than the date established in the permit.

This permit expires on April 3, 2024. A renewal application is due on April 3, 2023. A complete renewal application is due no later than October 3, 2023.

G6. Transfer of Ownership or Operational Control  
WAC 173-401-720(1)(d)
A change in permittee due to transfer of ownership or operational control of an affected source requires a request for administrative permit amendment as governed by WAC 173-401-720(1)(d).

G7. Misrepresentation and Tampering  
SWCAA 400-105(5) & (6)
The permittee shall not make any false material statement, representation or certification in any form, notice, or report. The permittee shall not render inaccurate any monitoring device or method required under Chapter 70.94 RCW, or any ordinance, resolution, regulation, permit, or order in force pursuant thereto.

G8. New Source Review  
WAC 173-400-700  
WAC 173-460 (Effective 8/21/1998) (Local Only)
The Permittee shall not construct or modify a source which is required to be reviewed under WAC 173-400-700, WAC 173-460 (effective 8/21/1998), SWCAA 400-109 or SWCAA 400-800 without first receiving an approval or permit under such provisions. Portable sources may be exempt from this requirement if they fulfill the criteria described in G9. This requirement is not applicable to emission units that comply with the provisions of SWCAA 400-072.

G9. Portable Sources  
SWCAA 400-036  
SWCAA 400-110(6)
Portable sources which locate temporarily at the site of an air operating permit source shall be allowed to operate at the temporary location without filing an Air Discharge Permit application provided that:

(a) The source/emissions units are registered with SWCAA;
(b) The source/emissions units have an air discharge permit to operate as a portable source or have an approved permit that meets the requirements of SWCAA 400-036;
(c) The owner(s) or operator(s) notifies SWCAA of the intent to operate at the new location at least ten business days prior to starting the operation; and
(d) The owner(s) or operator(s) supplies sufficient information including production quantities and hours of operation, to enable SWCAA to determine that the operation will comply with the emission standards for a new source, and will not cause a violation of applicable ambient air quality standards and, if in a nonattainment area, will not interfere with scheduled attainment of ambient standards.

G10. Technology at an Existing Stationary Source  
SWCAA 400-114
Prior to replacing or substantially altering emission control technology or equipment installed at an existing stationary source or emission unit, the permittee shall file an air discharge permit application with SWCAA. Construction shall not commence on a project subject to review until SWCAA issues a final air discharge permit or other regulatory order. However, any air discharge permit application filed
under this section shall be deemed to be approved without conditions if the Agency takes no action within thirty (30) days of receipt of a complete application.

G11. Maintenance of Process Equipment

Any process equipment, including features, machines, and devices constituting parts of or called for by plans, specifications, or other information submitted for approval or required as part of an approval shall be maintained and operate in good working order. The Agency reserves the right to take any and all appropriate action to maintain compliance with approval conditions, including directing the facility to cease operations of defective or malfunctioning equipment until corrective action can be completed.

G12. Maintenance of Pollution Control Equipment

Any equipment that serves as air contaminant control or capture equipment shall be maintained and operated in good working order at all times in accordance with good operations and maintenance practices and in accordance with Agency approval conditions. The Agency reserves the right to take any and all appropriate action to maintain compliance with approval conditions, including directing the facility to cease operations of defective or malfunctioning equipment until corrective action can be completed.

G13. Outdoor Burning

The permittee is prohibited from conducting outdoor burning except as allowed by SWCAA 425.

G14. Asbestos

The permittee shall comply with the provisions of SWCAA 476 “Standards for Asbestos Control, Demolition and Renovation” when conducting any renovation, demolition or asbestos storage activities at the facility.

G15. Protection of Stratospheric Ozone

The permittee shall comply with the standards for recycling and emissions reduction as provided in 40 CFR 82, Subpart F.

G16. Chemical Accident Prevention Program

The permittee shall comply with the requirements of the Chemical Accident Prevention Provisions of 40 CFR 68 no later than the following dates:

(a) Three years after the date on which a regulated substance, present above the threshold quantity, is first listed under 40 CFR 68.130; or

(b) The date on which a regulated substance is first present above a threshold quantity in a process.

G17. Reporting of Emission of Greenhouse Gases

WAC 173-441 requires owners and operators of affected facilities to quantify and report emissions of greenhouse gases from applicable source categories listed in WAC 173-441-120. This regulation applies to any facility located in Washington State with total greenhouse gas emissions of ten thousand metric tons CO₂e or more per calendar year. The permittee shall prepare and submit greenhouse gas reports to Ecology in accordance with the provisions of WAC 173-441-050 for each affected facility.
VI. OPERATING TERMS AND CONDITIONS

The following table lists all federal, state, and/or locally enforceable requirements applicable to the permittee. The effective date for each applicable requirement is listed in Section II of this Permit. The applicable legal authority is listed below each requirement. Applicable requirements identified as having "plantwide" applicability apply to both EUs and IEUs.

Some of the requirements have been partially adopted into the Washington State Implementation Plan (SIP). Only those parts adopted into the Washington SIP are federally enforceable. Requirements which are not required under the FCAA are denoted as state or local only. Monitoring requirements are intended to provide a reasonable assurance of compliance with the applicable requirements, and may or may not involve the use of a reference test method.

| Req 53 | The permittee shall conduct the following maintenance for each emergency engine:  
(a) Change oil and filter every 500 hours of operation or annually, whichever comes first. An oil analysis program as described in 40 CFR 63.6625(i) may be utilized in lieu of the proscribed intervals.  
(b) Inspect air cleaner every 1,000 hours of operation or annually, whichever comes first. Replace as necessary.  
(c) Inspect all hoses and belts every 500 hours of operation or annually, whichever comes first. Replace as necessary.                                                                                                                                                                     | EU4 EU5        | M13        |

VII. MONITORING TERMS AND CONDITIONS
To assure compliance with all applicable requirements, the permittee shall perform the monitoring program specified below. Specified monitoring is not required whenever an emission unit is not operated during a time period equal to or greater than the designated monitoring period. For these periods, the permittee shall record and report the reason why and the length of time the emission unit was not operated. Pursuant to WAC 173-401-530(2)(c), monitoring requirements are not applicable to IEUs unless specified below.

The permittee shall make a record of all required monitoring activities as described in Sections K1 and K2 of this permit.
General

M1. Visible Emissions Monitoring  WAC 173-401-615(1)
This monitoring requirement applies to Reqs 1, 30, 40, 46
This monitoring requirement is applicable to both EU's and IEUs.

On a monthly basis, the permittee shall perform a brief qualitative observation of affected emission units during daylight hours for the purpose of identifying potential visible emissions violations. Based upon the qualitative observation, the permittee shall take one or more of the following actions:

(a) If no visible emissions are observed, the permittee shall make a record of the observation, and no further action is necessary.

(b) If visible emissions are observed, the permittee shall identify the source of the emissions, and confirm whether or not the pertinent equipment is experiencing a malfunction and that all relevant air pollution control equipment is operating properly. The permittee shall take corrective action to resolve the problem within 24 hours of initial discovery, and shall notify SWCAA regarding its progress in resolving the problem.

(c) Subsequent to taking corrective action, the permittee shall perform a second qualitative observation of affected emission units. If no visible emissions are observed, then no further action is necessary. If visible emissions are still observed, the permittee shall demonstrate compliance with applicable visible emission limits by conducting a visible emissions evaluation in accordance with SWCAA Method 9 within 72 hours of initial discovery. For visible emissions in compliance with applicable visible emission limits, no further action is necessary.

If observed visible emissions are demonstrated to be out of compliance with applicable visible emissions limits, the permittee shall report an excess emission as described in Section R1 and make a record of the event. Additional adjustments, repairs, and/or maintenance shall be performed as soon as practical to reduce the visible emissions to a level at or below the applicable opacity limit.

Implementation of corrective action does not shield the permittee from enforcement action by SWCAA or from the obligation of reporting permit deviations as specified in WAC 173-401-615(3).

General

M2. Fugitive Emissions/Particulate Matter Monitoring  WAC 173-401-615(1)
This monitoring requirement applies to Reqs 2-4, 8-11
This monitoring requirement is applicable to both EU's and IEUs.

On a monthly basis, or in response to a complaint, the permittee shall perform an inspection of affected emission units during daylight hours for the purpose of identifying fugitive emissions, odors, fallout and potential violations of applicable particulate matter emission limits. Based upon results of the inspection, the permittee shall take one or more of the following actions:

(a) If no visible emissions, odor or fallout are observed, affected emission units are assumed to be in compliance with applicable emission limits. The permittee shall make a record of the observation and no further action is necessary.

(b) If visible emissions, odor or fallout are observed during an inspection, the permittee shall verify the emission unit or process that is the source of emissions and any associated air pollution control equipment are operating properly. If the equipment is not operating properly, the permittee shall
resolve the problem no later than 24 hours after initial discovery, or notify SWCAA by the next business day of the progress made in resolving the problem. Subsequent to resolving the problem, a second inspection shall be made. If visible emissions, odor or fallout are still observed, the permittee shall continue to make adjustments and/or repairs until such time as the affected emission unit is demonstrated to be in compliance. Reasonable precautions and good work practices shall be employed to minimize emissions for the duration of the event.

Implementation of corrective action does not relieve the permittee from the obligation of reporting permit deviations as specified in WAC 173-401-615(3).

**General**

**M3. Complaint Monitoring**

This monitoring requirement applies to Reqs 2, 4-5

This monitoring requirement is applicable to both EU's and IEUs.

The permittee shall record, and maintain record of, any air quality related complaints received by the facility. All complaints shall be investigated no later than 1 work day after the permittee has been notified. The permittee shall determine the validity of each complaint and the cause of any emissions that may have prompted the complaint, and initiate appropriate corrective action in response to the complaint. Within 24 hours of notification and investigation, permittee shall resolve the subject of the complaint, or notify SWCAA by the next working day of progress made in resolving the complaint.

**Combustion Turbine**

**M4. Operations Monitoring**

This monitoring requirement applies to Reqs 23-28

The permittee shall monitor and record the operational parameters/events listed below.

(a) Hourly heat input (MMBtu/hr) for every hour or part of any hour during which fuel is combusted following procedure 5 in Appendix F of 40 CFR Part 75;

(b) Hourly fuel consumption (MMscf/hr);

(c) Hourly turbine output (MW);

(d) Startup and shutdown periods;

(e) Combustion turbine maintenance and repair activities;

(f) CEMS calibration and cylinder gas audit results;

(g) CEMS maintenance and repair activities;

(h) Differential pressure across each catalyst bed monitored continuously and recorded once per workshift;

(i) Temperature before and after each catalyst bed monitored continuously and recorded once per workshift;

(j) Hourly ammonia consumption (lbs);

(k) Average hourly NOx and CO emission concentration (ppmv @ 15% O2);

(l) Average hourly O2 concentration (dry volume percent);
The fuel sulfur content of natural gas combusted in the Combustion Turbine on an annual basis shall be determined in accordance with 40 CFR 75.11.

Daily CO₂ emission rates (ton/dy) shall be calculated based on the procedures specified in 40 CFR 75.10(a)(3).

Hourly SO₂ emission rates shall be calculated from contemporaneous heat input values and the most recent sulfur content monitoring results in accordance with 40 CFR Part 75 Appendix D. For pipeline natural gas, an emission factor of 0.0006 lb/MMBtu may be used to calculate emissions. For natural gas that does not qualify as pipeline natural gas, SO₂ emissions shall be calculated using equation D1-h of 40 CFR 75 and actual fuel sulfur content as provided in 40 CFR 75, Appendix D, Section 2.3.

Hourly VOC, PM and NH₃ emissions shall be calculated from contemporaneous heat input values and the most recent emission test data for the Combustion Turbine.

A CEMS/DAHS for NOₓ and O₂ shall be installed and maintained in accordance with the requirements and specifications found in 40 CFR 75 – Continuous Emissions Monitoring. Hourly NOₓ emission rates (lb/MMBtu) shall be calculated based on the monitored NOₓ concentration (ppmv) and diluent concentration (dry volume percent O₂) in accordance with the procedures in 40 CFR 75, Appendix F. Hourly NOₓ emissions (lb/hr) shall be calculated using the hourly NOₓ emission rate and the average heat input to the turbine as determined in M5.

A CEMS/DAHS for CO shall be installed and maintained in accordance with the requirements and specifications found in 40 CFR 60, Appendix B - Performance Specification 4A "Specifications and Test Procedures for Carbon Monoxide Continuous Emission Monitoring Systems in Stationary Sources" and 40 CFR 60, Appendix F "Quality Assurance Procedures". Hourly CO emission rates (lb/MMBtu) shall be calculated based on the monitored CO concentration (ppmv) and diluent concentration (dry volume percent O₂) in accordance with Equation 19-1 from 40 CFR Part 60 Appendix A. Hourly CO emissions (lb/hr) shall be calculated using the hourly CO emission rate and the average heat input to the turbine as determined in M5.

Relative accuracy test audits (RATA) shall be conducted for each CEMS as specified in the applicable performance specification. RATA reports shall be submitted to SWCAA within 45 days of test completion and shall include all of the source test information required in R9 of this permit. Records of monitoring activities shall be maintained in accordance with Section K2 of this permit.
Combustion Turbine

M7. **Startup and Shutdown Emissions**

ADP 95-1800R5, Condition 3, 22, 25(d)

This monitoring requirement applies to Req 29

Turbine startup and shutdown periods shall be clearly identified and recorded in the facility's DAHS. Emissions during the startup and shutdown events shall be determined from CEMS data if emissions are within the measurement range of the CEMS. If validated CEMS data is not available, emissions shall be determined using vendor supplied emission factors, source test data, and/or data substitution methods approved by SWCAA. Emissions during startup and shutdown events must be considered in determining compliance with annual facility wide emission limits.

Combustion Turbine

M8. **Emission Testing**

ADP 95-1800R5, Condition 29

This monitoring requirement applies to Reqs 23-28

The Combustion Turbine shall be emission tested for NO\textsubscript{X}, CO and NH\textsubscript{3} on a continuing 12-month cycle in accordance with the protocol found in Appendix A of this permit. Tested emission concentrations from the Combustion Turbine shall be corrected to units that correspond to the emission limitations contained in this permit. Tested NO\textsubscript{X} concentrations shall also be corrected to 15% O\textsubscript{2}.

Initial emission testing for the Combustion Turbine was conducted on September 11-12, 1997 and October 23, 1997. The initial testing quantified emissions of NO\textsubscript{X}, CO, SO\textsubscript{2}, PM, VOC and NH\textsubscript{3}.

Combustion Turbine

M9. **Ammonia Concentration Monitoring**

ADP 95-1800R5, Condition 24

This monitoring requirement applies to Req 32

The permittee shall maintain a record of the delivery date and ammonia concentration of each ammonia shipment. A certification from the ammonia supplier can be used to satisfy this requirement.

Startup Boiler

M10. **Operations Monitoring**

40 CFR 60.49b(d) & (p)

ADP 95-1800R5, Condition 26

This monitoring requirement applies to Reqs 35-39, 41

The permittee shall monitor and record the operational parameters listed below for each day of startup boiler operation:

(a) Calendar date;
(b) Hours of operation;
(c) Hourly steam load;
(d) Fuel consumption; and
(e) Maintenance and repair activity.

A calculation of the annual capacity factor shall be made at the end of each calendar month. The annual capacity factor of the Startup Boiler shall be calculated by dividing actual annual heat input by potential annual heat input for the preceding 12 consecutive month period.

Monthly emissions of NO\textsubscript{X} and CO shall be calculated from recorded heat input and the most recent emission test data. Emission calculations shall use the following equation:
Monthly emissions of PM, VOC, and SO\textsubscript{2} shall be calculated based on recorded fuel consumption and the following emission factors:

<table>
<thead>
<tr>
<th>Pollutant</th>
<th>Emission Factor</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>PM</td>
<td>0.0039 lb/MMBtu</td>
<td>(initial emission test – 10/25/97)</td>
</tr>
<tr>
<td>VOC</td>
<td>0.0011 lb/MMBtu</td>
<td>(initial emission test – 10/25/97)</td>
</tr>
<tr>
<td>SO\textsubscript{2}</td>
<td>0.0006 lb/MMBtu</td>
<td>(AP-42, Section 1.4)</td>
</tr>
</tbody>
</table>

**Startup Boiler**

**Emission Testing**

This monitoring requirement applies to Reqs 35-39

The Startup Boiler shall be emission tested on a continuing 5-year cycle in accordance with the protocol found in Appendix B of this permit. Measured pollutant concentrations from the Startup Boiler shall be corrected to dry standard conditions at 3\% O\textsubscript{2}. Emission rates of NO\textsubscript{x} and CO (lb/MMBtu) shall be calculated based on the tested constituent concentration (ppmv) and diluent concentration (in percent O\textsubscript{2} or CO\textsubscript{2}) in accordance with Equation 19-1 from 40 CFR Part 60 Appendix A.

Initial emission testing for the Startup Boiler was conducted on October 25, 1997. The initial testing quantified emissions of NO\textsubscript{x}, CO, VOC and PM.

**Fuel Gas Heater**

**Operations Monitoring**

This monitoring requirement applies to Reqs 42-45

The permittee shall monitor and record the operational parameters listed below for each month of Fuel Gas Heater operation:

(a) Fuel consumption; and
(b) Hours of operation.

Monthly emissions from the Fuel Gas Heater shall be calculated based on recorded fuel consumption and the following emission factors:

<table>
<thead>
<tr>
<th>Pollutant</th>
<th>Emission Factor</th>
</tr>
</thead>
<tbody>
<tr>
<td>NO\textsubscript{x}</td>
<td>0.117 lb/MMBtu</td>

</tr>
<tr>
<td>VOC</td>
<td>0.038 lb/MMBtu</td>
</tr>
<tr>
<td>SO\textsubscript{2}</td>
<td>0.0006 lb/MMBtu</td>
</tr>
</tbody>
</table>
Emergency Generator/Emergency Fire Pump

M13. Operations Monitoring

This monitoring requirement applies to Reqs 47-49, 51-53

The Permittee shall monitor and record the following operational parameters for the Emergency Generator and Emergency Fire Pump:

(a) Each incidence of maintenance and repairs conducted according to the manufacturer's emission related operation and maintenance instructions or the facility developed maintenance plan. Activities to be documented include, but are not limited to, oil and oil filter changes, air cleaner inspections, and inspection of hoses and belts; and

(b) The number of hours of engine operation in each calendar year shall be recorded from the non-resettable hour meter. The permittee shall document how many hours are spent for emergency and nonemergency operation, including what classified the operation as emergency.

Monthly emissions from the Emergency Generator and the Emergency Fire Pump shall be calculated from recorded hours of operation, the respective horsepower rating of each engine, and the following emission factors from AP-42, Table 3.3-2 (5/95):

<table>
<thead>
<tr>
<th>Pollutant</th>
<th>Emission Factor</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOx</td>
<td>0.031 lb/hp-hr</td>
</tr>
<tr>
<td>CO</td>
<td>6.68E-3 lb/hp-hr</td>
</tr>
<tr>
<td>PM</td>
<td>2.20E-3 lb/hp-hr</td>
</tr>
<tr>
<td>TOC</td>
<td>2.47E-3 lb/hp-hr</td>
</tr>
<tr>
<td>SO2</td>
<td>2.05E-3 lb/hp-hr</td>
</tr>
</tbody>
</table>

M14. Emissions Monitoring

This monitoring requirement applies to Reqs 12-17

On a monthly basis, the Permittee shall determine the sum of NOx, CO, PM, VOC, SO2 and NH3 emissions from all emission units at the facility in accordance with applicable monitoring requirements. The Permittee shall use the monthly emission summaries to calculate total plantwide emissions on a 12-month rolling basis (current month plus 11 preceding months).

VIII. RECORDKEEPING TERMS AND CONDITIONS

The permittee shall maintain files of all information, including all reports and notifications, recorded in a form suitable and readily available for expeditious inspection and review. The files shall be retained for at least five (5) years following the date of each occurrence, measurement, maintenance, corrective action, report, or record. Pursuant to WAC 173-401-530(2)(c), recordkeeping requirements are not applicable to IEUs unless specified below.
K1. **General Recordkeeping**

Permittee is required to keep the following records as applicable:

(a) **Inspections and Certifications**
   (1) Date and time of the inspection or certification;
   (2) Name and title of the person who conducted the inspection or certification;
   (3) Identification of the unit or activity being inspected or certified;
   (4) Operating conditions of the unit or the type of activity occurring at the time of the inspection or certification;
   (5) Compliance status of each monitored requirement as described in Sections V and VII of this Permit; and
   (6) Description of corrective action (if any) taken in response to a discovered permit deviation, excess emission, upset condition, or malfunction, as applicable.

(b) **Complaints**
   (1) Date and time of complaint;
   (2) Name of the complainant;
   (3) The nature of the complaint;
   (4) Date and time of follow-up inspection;
   (5) The name and title of the person who conducted the inspection or certification; and
   (6) Description of corrective action (if any) taken in response to complaint.

(c) **Sampling and Emissions Testing**
   (1) Date sampling was performed;
   (2) Entity that performed the sampling;
   (3) Name and title of the person or the entity that performed the sampling or testing;
   (4) Analytical techniques used to take the sample;
   (5) Operating conditions existing at the time of sampling or measurement to include, as a minimum for emission point source testing:
      (A) Heat input (million Btu/hr) (EU-1 and EU-2);
      (B) Fuel consumption rate (EU-1 and EU-2);
      (C) Air discharge flowrate (dry standard cubic feet);
      (D) Exhaust temperature of emissions out the stack (EU-1 and EU-2);
      (E) Unit load on an hourly basis (EU-1);
   (6) Date analytical analyses (if any) were performed;
   (7) Entity that performed the analyses;
   (8) Analytical techniques or methods used;
   (9) Results of such analyses;
   (10) Compliance status of each monitored requirement as described in Section V and VII of this permit; and
   (11) Description of corrective action taken in response to permit deviations and when action was initiated.

(d) **Periodic Monitoring and Emissions Records**
   (1) Date and time of parameter observation or emission calculation;
   (2) Name of parameter observed, or emission calculated;
   (3) Observed parameter value or calculated emission value with appropriate units; and
   (4) Periods that data was unavailable.
(e) Excess Emissions and Upset Conditions
(1) Date and time of excess emission or upset condition occurred;
(2) Nature of the excess emission or upset condition and an identification of the affected unit, process, or activity; and
(3) Description of corrective action taken in response to a discovered permit deviation, excess emission, upset condition, or malfunction, as applicable.

(f) Maintenance Activities
(1) Date and time of the maintenance activity;
(2) Name of the person who performed the maintenance;
(3) Identification of the unit or activity being maintained; and
(4) Description of the maintenance being conducted.

K2. Continuous Emission Data Recordkeeping  ADP 95-1800R5, Conditions 21 & 22

The permittee shall maintain a file for the Combustion Turbine containing the measurements, data, reports, and general information identified below. The file shall be maintained at the source in a readily accessible form suitable for inspection for at least five (5) years from the date of each record.

(a) General Records
The file shall include the following information for the Combustion Turbine:
(1) The data and information required in (b) through (f) of 40 CFR 75.54;
(2) The supporting data and information used to calculate values required in paragraphs (b) through (f) of 40 CFR 75.54;
(3) The certification test data and information required in 40 CFR 75.56 for tests required under 40 CFR 75.20, beginning with the date of the first certification test performed, and the quality assurance and quality control data and information required in 40 CFR 75.56 for tests and the quality assurance/quality control plan required under 40 CFR 75.21 and Appendix B of 40 CFR 75, beginning with the date of provisional certification;
(4) The current monitoring plan as described in 40 CFR 75.53; and
(5) The quality control plan as described in 40 CFR 75, Appendix B.
(6) Percent monitoring system data availability, (recorded to the nearest tenth of a percent), calculated pursuant to 40 CFR 75.32.

(b) Operating Parameter and Emission Records
The file shall include the following information for each hour of unit operating time for the Combustion Turbine:
(1) Date and hour;
(2) Actual operating time (rounded up to nearest 15 minutes);
(3) Total gross turbine load (rounded to nearest MWge);
(4) Total turbine heat input (million Btu); and
(5) Combustion Turbine fuel consumption (MMBtu/hr).
(6) Average NOx concentration (ppmv @ 15%O2);
(7) Average NOx emission rate (lb/million Btu and lb/hr);
(8) Average CO concentration (ppmv @ 15%O2);
(9) Average CO emission rate (lb/hr);
(10) Average O2 concentration (%O2); and
IX. REPORTING TERMS AND CONDITIONS
All required reports must be certified by a responsible official consistent with WAC 173-401-520. Where an applicable requirement requires reporting more frequently than once every six months, the responsible official's certification need only be submitted once every six months, covering all required reporting since the date of the last certification. Where a reporting schedule is specified (e.g., quarterly, semi-annual, or annual), compliance with the reporting frequency is met when reports are submitted more frequently than required. Pursuant to WAC 173-401-530(2)(c), reporting requirements are not applicable to IEUs unless specified below.

Reports shall be submitted to the following addresses, unless otherwise instructed:

Control Officer
Southwest Clean Air Agency
11815 NE 99 Street, Suite 1294
Vancouver, WA 98682

Clean Air Act Compliance Manager
U.S. EPA Region 10, Mail Stop: OCE-101
1200 Sixth Avenue, Suite 900
Seattle, WA 98101

Department of Ecology
Air Quality Program
PO Box 47600
Olympia, WA 98504-7600

40 CFR 60.7(b), 40 CFR 64.9(a)(2)(i)
WAC 173-401-615(3)(b)
SWCAA 400-107

R1. Deviations from Permit Conditions
ADP 95-1800R5, Conditions 34 & 35
The permittee shall report deviations from permit conditions to SWCAA no later than thirty days after the end of the month during which the deviation is discovered. Deviations that represent a potential threat to human health or safety shall be reported as soon as possible but no later than twelve hours after the deviation is discovered.

Excess emissions shall be reported as soon as possible. In accordance with SWCAA 400-107(1), excess emissions that the permittee wishes to be considered unavoidable must be reported no later than 48 hours after discovery.

All deviation reports shall be submitted in writing (e.g., e-mail, facsimile or letter). Each report shall include the following information:
(a) Identification of the emission unit(s) involved;
(b) Duration of the event including the beginning and end times;
(c) Description of the event, including:
   (1) Whether or not the deviation was due to an upset condition, and
   (2) Probable cause of the deviations;
(d) Estimate of the quantity of excess emissions for exceedances of non-opacity emission limits;
(e) Description of corrective action taken in response to the event (if any); and
(f) Preventive measures taken or planned to minimize future recurrence.
R2. Complaint Reports

The permittee shall report all air pollution related complaints to SWCAA within 3 business days of receipt. Complaint reports shall include the following information:

(a) Date and time of the complaint;
(b) Name of the complainant;
(c) Nature of the complaint; and
(d) Description of corrective action taken in response to complaint (if any).

R3. Startup and Shutdown Reports

The Permittee shall report each Combustion Turbine startup and shutdown period to SWCAA within 24 hours of occurrence.

R4. Quarterly Reports

General Information

The Permittee shall submit quarterly reports to SWCAA no later than 30 days after the end of each quarter of the calendar year. Each report must be certified by a responsible official consistent with WAC 173-401-520. Each report shall contain, at a minimum, the following information:

(a) Records of all required monitoring and plant inspections as described in monitoring requirements M1 thru M4. A copy of the relevant opacity certification(s) shall be submitted with the report for all EPA Method 9 and/or SWCAA Method 9 monitoring conducted during the reporting period;
(b) A summary of all deviations from permit conditions that occurred during the reporting period;
(c) Hours of operation for all emission units;
(d) Quantity of fuel burned in emission units EU1, EU2, and EU3;
(e) Ammonia flow for each hour of turbine operation;
(f) Quantity of ammonia used during the reporting period;
(g) Hourly and daily (24-hr) CEMS/DAHS values for each data element identified in Section K2.(b) of this permit;
(h) The results of any/all CEMS calibrations and cylinder gas audits conducted during the quarter.
(i) Identification of any periods during which required CEMS data is not available and an explanation of why the data is missing;
(j) Information required under 40 CFR 60 Subparts Db and GG and other implementing sections such as 40 CFR 60.7 and 40 CFR 60.8 unless provisions have been waived by EPA administrative action;
(k) Annual capacity factor for EU-2 for the previous 12-month period as described in 40 CFR 60.49b(q); and
(l) Summary of plantwide emissions of criteria pollutants, volatile organic compounds and ammonia for each month of the reporting period, the total for the reporting period, and the 12-month rolling total.

Acid Rain Data

The permittee's designated representative shall electronically report the data and information identified below in accordance with 40 CFR 75.64 and 75.65. Each electronic report must be submitted to the EPA Administrator within 30 days following the end of each calendar quarter and shall include:

(m) The information and hourly data required in 40 CFR 75.64 and 75.65, excluding the descriptions of adjustments, corrective action, and maintenance, and excluding any information which is
incompatible with electronic reporting (e.g., field data sheets, lab analyses, quality control plan, etc.),

(n) Tons (rounded to the nearest tenth) of SO$_2$ emitted during the quarter and cumulative SO$_2$
emissions for the calendar year,

(o) Tons of CO$_2$ emitted during the quarter and cumulative CO$_2$ emissions for the calendar year, and

(p) Total heat input (million Btu) for the quarter and cumulative heat input for the calendar year;

R5. Semi-Annual Reports

Consistent with WAC 173-401-615(3) the permittee shall submit to SWCAA by September 15th and
March 15th for the six-month periods January through June and July through December respectively, a
report on the status of all monitoring requirements. All instances of deviation from permit requirements
shall be clearly identified. If no deviations occurred, then a statement to that effect shall be submitted.

The semi-annual report shall contain a certification of all reports previously submitted during the semi-
annual period that have not already been certified. The certification shall be consistent with WAC 173-
401-520.

Separate semi-annual reports are not necessary if the permittee elects to provide the above information and
certification with each quarterly report.

R6. Emission Inventory Reports

The permittee shall submit an inventory of annual emissions for each calendar year to SWCAA by March
15th of the following year in accordance with SWCAA 400-105, unless an alternate date is approved by
SWCAA. The inventory shall include stack and fugitive emissions of NO$_x$, SO$_2$, CO, VOC, PM, PM$_{10}$,
PM$_{2.5}$, hazardous air pollutants, and toxic air pollutants as defined in WAC 173-460 (effective 8/21/98).
TAP emissions shall be calculated consistent with the emission factors and methodology presented in the

R7. Annual Compliance Certification

The permittee shall submit to SWCAA and EPA a certification of compliance with all terms and
conditions of this permit in accordance with WAC 173-401-630(5)(d). The permittee shall submit the
following information by March 15th for the previous calendar year:

(a) Identification of each term or condition of the permit that is the basis of the certification;

(b) Statement of compliance status;

(c) Whether compliance was continuous or intermittent;

(d) Method(s) used for determining the compliance status of the source, currently and over the
reporting period consistent with WAC 173-401-615;

(e) Such other facts as SWCAA may require to determine the compliance status of the source; and

(f) Such additional requirements as may be specified pursuant to Sections 114(a)(3) and 504(b) of the
FCAA.
R8. Fuel Sulfur Content Reports

The permittee shall report the results of each fuel sulfur sampling to SWCAA within 45 days of test completion. Each test report shall include:

(a) Time and date of the fuel sampling;
(b) A summary of sampling results. Fuel sulfur content results shall, at a minimum, be reported in units of gr/100 scf and lb/MMBtu;
(c) A description of the test methods or procedures used including all field data, quality assurance/quality control procedures and documentation;
(d) A description of the analytical procedures used including all laboratory data, quality assurance/quality control procedures and documentation,
(e) Chain of custody information; and
(f) Discussion of any abnormalities associated with the results.

WAC 173-401-615(3)
SWCAA 400-106

R9. Emission Test Reports

The permittee shall do the following for each emission test:

(a) Submit a comprehensive test plan to SWCAA for review and approval at least ten business days prior to any periodic testing;
(b) Notify SWCAA at least five business days in advance of any periodic testing so that SWCAA personnel may be present during testing;
(c) Report a summary of operating conditions for each test run as specified in ADP 95-1800R5, Appendices A and C;
(d) Report required test results to SWCAA within 45 days of test completion. All gaseous emissions shall, as a minimum, be reported in parts per million by volume, pounds per hour, and pounds per million Btu of heat input. Emissions data shall be corrected to units that correspond to the applicable standard. Each required source test report shall include:

(1) A description of the source including manufacturer, model number and design capacity of the equipment, and the location of the sample ports or test locations,
(2) Time and date of the test and identification and qualifications of the personnel involved,
(3) A summary of results, reported in units and averaging periods consistent with the applicable emission standard or limit,
(4) A summary of control system or equipment operating conditions,
(5) A summary of production related parameters,
(6) A description of the test methods or procedures used including all field data, quality assurance/quality control procedures and documentation,
(7) A description of the analytical procedures used including all laboratory data, quality assurance/quality control procedures and documentation,
(8) Copies of field data and example calculations,
(9) Chain of custody information,
(10) Calibration documentation,
(11) Discussion of any abnormalities associated with the results, and
(12) A statement signed by the senior management official of the testing firm certifying the validity of the source test report.
R10. General Acid Rain Reports
40 CFR 75.60, 75.61, 75.63
The designated representative shall comply with all Acid Rain Program reporting requirements in accordance with 40 CFR 75.60 and with the signatory requirements of 40 CFR 72.21.

The permittee or designated representative shall submit written notification to SW CAA and EPA Region X of certification tests, recertification tests, and revised test dates as specified in 40 CFR 75.20 for CEMS in accordance with 40 CFR 75.61. The designated representative shall submit applications and reports in accordance with 40 CFR 75.63.

X. NON-APPLICABLE TERMS AND CONDITIONS
The following lists all federal, state, and/or local requirements that might reasonably apply to the permittee, but are deemed nonapplicable after review by SW CAA. In accordance with WAC 173-401-640, the permittee is provided a permit shield for not complying with the requirements listed below where they have been identified to be non-applicable to specific emission units.

Standards of Performance for Stationary Compression

N1. Ignition Internal Combustion Engines
40 CFR 60, Subpart III
Subpart III establishes performance standards for applicable to operators of stationary compression ignition (CI) internal combustion engines (ICE) that are manufactured after April 1, 2006 (except a fire pump engine), manufactured as a certified National Fire Protection Association (NFPA) fire pump engine after July 1, 2006, or modified/reconstructed after July 11, 2005. This facility has two compression ignition internal combustion engine emission units (emergency generator, fire pump). Both the units were manufactured prior to April 1, 2006, and have not been modified or reconstructed. Therefore, this regulation is not applicable.

Standards of Performance for Stationary Combustion

N2. Turbines
40 CFR 60, Subpart KKKK
Subpart KKKK establishes performance standards for stationary combustion turbines with a heat input at peak load equal to or greater than 10.7 gigajoules (10 MMBtu) per hour, which commenced construction, modification, or reconstruction after February 18, 2005. The Combustion Turbine at this facility commenced construction prior to February 18, 2005 so this regulation is not applicable.

National Emission Standards for Hazardous Air Pollutants

N3. for Industrial Process Cooling Towers
40 CFR 63, Subpart Q
Subpart Q establishes performance standards for all new and existing industrial process cooling towers that are operated with chromium-based water treatment chemicals on or after September 8, 1994. The cooling towers at this facility do not use chromium-based water treatment chemicals. Therefore, this requirement is not applicable.

National Emission Standards for Hazardous Air Pollutants

N4. for Combustion Turbines
40 CFR 63, Subpart YYYYY
Subpart YYYYY establishes performance standards for any existing, new, or reconstructed combustion turbine located at a facility that is a major source of hazardous air pollutant emissions. This facility is not a major source of hazardous air pollutant emissions. Therefore, this requirement is not applicable.
Portions of 40 CFR 63.6650 infer that semi-annual compliance reports are required for existing emergency CI engines. However, there are no reporting requirements listed as being applicable to these units in Table 7 (which summarized the requirements of the section), and it seems inappropriate to require emergency engines subject to no numeric emission or operating limit to submit semi-annual compliance status reports. Furthermore, EPA's response to comments on the proposed rule indicates that this was not the intent of the rule. In a memorandum dated February 17, 2010 from Melanie King to EPA Docket EPA-HQ-OAR-2008-0708, EPA wrote:

"EPA agrees with the commenter that semi-annual compliance reporting, and other types of reporting required under the General Provisions of 40 CFR part 63 are not appropriate for area sources that are not subject to numerical emission standards. EPA believes that recording information and maintaining records will provide EPA with assurance that facilities are meeting the work/management practices and other requirements applicable to their existing stationary engines. Further, EPA believes it is appropriate to extend the same approach to any sources that are not subject to numerical emission standards, including existing stationary CI engines less than 100 HP and existing stationary emergency CI engines..."
through (g) of that section, for calendar year 2010 and each subsequent calendar year. This regulation was proposed on April 10, 2009 (74FR16609) and finalized on September 22, 2009. In the preamble of the final promulgation, EPA responded to a question regarding whether the reporting requirements constitute an applicable requirement for the purposes of Title V. The response indicates that they are not.

As currently written, the definition of "applicable requirement" in 40 CFR 70.2 and 71.2 does not include a monitoring rule such as today's action, which is promulgated under CAA sections 114(a)(1) and 208. http://www.epa.gov/climatechange/emissions/ghgrulemaking.html

Carbon Dioxide Mitigation Program, Greenhouse Gases
Emissions Performance Standard and Sequestration Plans And

**N10. Programs for Thermal Electric Generating Facilities (State Only)**
WAC 173-407

Chapter 173-407 WAC contains provisions for mitigation of carbon dioxide emissions from fossil-fueled thermal electric generating facilities and greenhouse gas performance standards for baseload electric generation facilities. As described in WAC 173-401-600, the requirements in an AOP are drawn from the Federal and State Clean Air Acts, State and Local air permits, State and Local air pollution regulations, Chapter 70.98 RCW, and Chapter 80.50 RCW. Chapter 173-407 WAC is intended to implement the provisions of Chapters 80.70 RCW and 80.80 RCW. Therefore, requirements of Chapter 173-407 which may be applicable to the facility are not appropriate for inclusion in this Permit.

**N11. Requirements for Sources in a Maintenance Plan Area**
SWCAA 400-111

The permittee is not located in a maintenance plan area for any criteria pollutant; therefore, this regulation is not applicable.

**N12. Requirements for New Sources in Nonattainment Areas**
SWCAA 400-112

The permittee is not located in a nonattainment area for any criteria pollutant; therefore, this regulation is not applicable.

**N13. Bubble Rules**

WAC 173-400-120
SWCAA 400-120

The permittee has not requested an emission bubble for any regulated pollutant. Therefore, this regulation is not applicable.

**N14. Emission Reduction Credits**

SWCAA 400-130, SWCAA 400-131
SWCAA 400-136

The cited rule sections govern the creation, maintenance, and use of emission reduction credits within the Agency's jurisdiction. Conditions for the issuance of credits are detailed in SWCAA 400-131(3). Allowed uses for emission reduction credits are detailed in SWCAA 400-130(2). The permittee has not requested to create or use any emission reduction credits (ERCs). Therefore, this regulation is not applicable.

**N15. Source Registration Program**

SWCAA 400-100

SWCAA 400-100 implements SWCAA's source registration program. Pursuant to SWCAA 400-100(1)(b) sources subject to the Air Operating Permit program (WAC 173-401) are exempt from the registration program. Therefore, the registration program is not applicable to this facility.
APPENDIX A
Emission Testing Requirements / Combustion Turbine

1. Introduction:
The purpose of these emission testing requirements is to quantify emissions from the Combustion Turbine, and demonstrate compliance with the requirements of this Permit and applicable air quality regulations.

2. Testing Requirements:
   a. **Test plan.** A comprehensive test plan shall be submitted to SWCAA for review and approval at least 10 business days prior to testing. SWCAA personnel shall be informed at least five business days prior to testing so that a representative may be present during the test.

   b. **Testing schedule.** Emission testing shall be conducted on a 12-month cycle, no later than the end of October each year. The initial source test for the Combustion Turbine was conducted on September 11-12, 1997 and October 23, 1997. Tested pollutants included NO\(_x\), CO, SO\(_2\), PM, VOC, and NH\(_3\).

   c. **Test runs/Reference test methods.** Testing for each identified constituent pollutant shall consist of at least three test runs of the specified duration. All sampling shall be conducted at the outlet of the turbine/HRSG. Compliance with applicable emission limits shall be demonstrated by averaging the results of individual test runs. The test methods identified below shall be used unless alternate methods are approved in writing by SWCAA in advance of the emission testing. Relative Accuracy Test Audit (RATA) sampling runs for NO\(_x\) and CO may be used to comply with the annual emission testing requirement for those constituents (i.e., (3) 21-minute RATA runs = (1) 60-minute emission test run).

3. Source Operation:
   a. **Source operation.** The Combustion Turbine shall be operated at loads greater than 95% for the duration of testing.

   b. **Record of production parameters.** Production related parameters and equipment operating conditions shall be recorded during emissions testing to correlate operating conditions with emissions. Recorded parameters shall, at a minimum, include fuel input, turbine output, process startups and shutdowns, and plant adjustments. All recorded production parameters shall be documented in the emission test report.
4. Reporting Requirements:
   a. Test report. A final test report must be prepared and submitted to SWCAA within 45 calendar
days of test completion. Unless otherwise directed by SWCAA, a single hard copy of the report
and an electronic copy (e.g., Adobe format) of the report must be submitted SWCAA. Each report
must include:
   (1) Description of the source including manufacturer, model number and design capacity of the
equipment, and the location of the sample ports or test locations,
   (2) Time and date of the test and identification and qualifications of the personnel involved,
   (3) Summary of results, reported in units and averaging periods consistent with the application
   emissions standard or unit,
   (4) Summary of control system or equipment operating conditions,
   (5) Summary of production related parameters,
   (6) A description of the test methods or procedures used including all field data, quality
   assurance/quality control procedures and documentation,
   (7) A description of the analytical procedures used including all laboratory data, quality
   assurance/quality control procedures and documentation,
   (8) Copies of field data and example calculations,
   (9) Chain of custody information,
   (10) Calibration documentation,
   (11) Discussion of any abnormalities associated with the results, and
   (12) A statement signed by the senior management official of the testing firm certifying the
   validity of the source test report.

   b. Oxygen correction. All test results for constituent emission concentration shall be corrected to
15% oxygen.
APPENDIX B
Emission Testing Requirements / Startup Boiler

1. **Introduction:**
The purpose of these emission testing requirements is to quantify emissions from the startup boiler, and demonstrate compliance with the requirements of this Permit and applicable air quality regulations.

2. **Testing Requirements:**
   a. **Test plan.** A comprehensive test plan shall be submitted to SWCAA for review and approval at least 10 business days prior to each test. SWCAA personnel shall be informed at least five business days prior to testing so that a representative may be present during the test.
   
   b. **Testing schedule.** Emission testing shall be conducted on a (5) year cycle, no later than the end of October of the respective year. The initial source test for the startup boiler was conducted on October 25, 1997. Tested pollutants included NOx, CO, PM, and VOC.
   
   c. **Test runs/Reference test methods.** Testing for each identified constituent shall consist of at least (3) sampling runs of the specified duration. All sampling shall be conducted at the outlet of the startup boiler. Compliance with applicable emission limits shall be demonstrated by averaging the results of individual sampling runs. The test methods identified below shall be used unless alternate methods are approved in writing by SWCAA in advance of the emission testing.

3. **Source Operation:**
   a. **Source operation.** The startup boiler shall be operated at maximum achievable operating capacity for the duration of testing.
   
   b. **Record of production parameters.** Production related parameters and equipment operating conditions shall be recorded during emissions testing to correlate operating conditions with emissions. Recorded parameters shall, at a minimum, include fuel consumption, steam production, and plant adjustments. All recorded production parameters shall be documented in the test results report.
4. Reporting Requirements:
   a. Test report. A final test report must be prepared and submitted to SWCAA within 45 calendar days of test completion. Unless otherwise directed by SWCAA, a single hard copy of the report and an electronic copy (e.g. Adobe format) of the report must be submitted SWCAA. Each report must include:
      (1) Description of the source including manufacturer, model number and design capacity of the equipment, and the location of the sample ports or test locations,
      (2) Time and date of the test and identification and qualifications of the personnel involved,
      (3) Summary of results, reported in units and averaging periods consistent with the application emissions standard or unit,
      (4) Summary of control system or equipment operating conditions,
      (5) Summary of production related parameters,
      (6) A description of the test methods or procedures used including all field data, quality assurance/quality control procedures and documentation,
      (7) A description of the analytical procedures used including all laboratory data, quality assurance/quality control procedures and documentation,
      (8) Copies of field data and example calculations,
      (9) Chain of custody information,
      (10) Calibration documentation,
      (11) Discussion of any abnormalities associated with the results, and
      (12) A statement signed by the senior management official of the testing firm certifying the validity of the source test report.

   b. Oxygen correction. All test results for constituent emission concentration shall be corrected to 3% oxygen.
APPENDIX C
Acid Rain Permit No. SW-ARP-2-R3

Issued to:  River Road Generating Plant  
Operated by:  Clark Public Utilities  
Address:  5509 NW Lower River Road (SR 501)  
           Vancouver, WA 98666  
ORIS code:  07605  
Affected unit:  Turbine (Unit #1)  

Effective Date:  This Acid Rain permit, will become effective concurrent with the renewal of the associated Title V permit for the River Road Generating Plant (SW99-9-R3). The Acid Rain permit shall have a permit term of 5 years from the above effective date.  

Acid Rain Permit Contents

1) Statement of Basis.  
2) Comments, notes and justifications regarding permit decisions and changes made to the permit application forms during the review process, and any additional requirements or conditions as per WAC 173-406-501, Acid Rain Permit Contents.  
3) SO₂ allowances allocated under this permit and NOₓ requirements for each affected unit.  
4) Standard Requirements. The owners and operators of each affected unit must comply with the standard requirements and special provisions set forth in the permit application, this permit and WAC 173-406-106 "Standard Requirements".  
5) Permit Application.  

1) Statement of Basis  
Statutory and Regulatory Authorities: The Southwest Clean Air Agency issues this permit in accordance with Washington Administrative Code (WAC) 173-406 "Acid Rain Regulation" and WAC 173-401 "Operating Permit Regulation". WAC 173-406 is based on the provisions of Title 40 Code of Federal Regulations ( CFR) parts 72-76, which is part of the requirements established pursuant to Title IV of the Clean Air Act, 40 U.S.C. 7401, et seq., as amended by Public Law 101-549 (November 15, 1990).  

2) Comments, Notes and Justifications  
This Acid Rain Permit is deemed to incorporate the definition of terms under WAC 173-406-101 unless otherwise expressly defined in this permit.
3) **SO₂ Allowance Allocations and NOₓ Requirements**

**Table Footnotes**

<sup>a</sup> Pursuant to 40 CFR 72.9(c)(i) and WAC 173-406-106(3)(a)(i) this unit is required to hold SO₂ allowances, as of the allowance transfer deadline, in the unit’s compliance subaccount not less than the total annual emissions of sulfur dioxide from the unit for the previous calendar year.

<sup>b</sup> This acid rain permit shall not be construed to exempt or exclude an affected unit from compliance with any other provisions of the Clean Air Act consistent with 40 CFR 72.9(h) and WAC 173-406-106(8). An SO₂ emission limitation has been established for the Combustion Turbine in ADP 95-1800R5, and is included as an applicable requirement in the Air Operating Permit for the River Road Generating Plant.

<sup>c</sup> Since this unit is not a coal fired unit, there are no applicable acid rain NOₓ emission limits and a Phase II NOₓ permit application is not required. A NOₓ emission limitation has been established for the Combustion Turbine in ADP 95-1800R5, and is included as an applicable requirement in the Air Operating Permit for the River Road Generating Plant.

4) **Standard Requirements**

**Permit Requirements**

(1) The designated representative of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall:

   (i) Submit a complete Acid Rain permit application (including a compliance plan) under 40 CFR part 72 in accordance with the deadlines specified in 40 CFR 72.30 and WAC 173-406-301; and

   (ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review an Acid Rain permit application and issue or deny an Acid Rain permit.

(2) The owners or operators of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall:

   (i) Operate the unit in compliance with a complete Acid Rain permit application or a superseding Acid Rain permit issued by the permitting authority; and

   (ii) Have an Acid Rain permit.

**Monitoring Requirements**

(1) The owners and operators and, to the extent applicable, designated representative of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall comply with the monitoring requirements as provided in 40 CFR part 75.

(2) The emissions measurements recorded and reported in accordance with 40 CFR Part 75 shall be used to determine compliance by the unit with the Acid Rain emissions limitations and emissions reduction requirements for sulfur dioxide and nitrogen oxides under the Acid Rain program.

(3) The requirements of 40 CFR Part 75 shall not affect the responsibility of the owners and operator to monitor emissions of other pollutants or other emissions characteristics at the unit.
under other applicable requirements of the Act, applicable requirements of Title 173 WAC, and other provisions of the operating permit for the River Road Generating Plant.

**Sulfur Dioxide Requirements**

(1) The owners and operators of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall:

   (i) Hold allowances, as of the allowance transfer deadline, in the unit's compliance subaccount (after deductions under 40 CFR 73.34(c)), or in the compliance subaccount of another affected unit at the same source to the extent provided in 40 CFR 73.35(b)(3), not less than the total annual emissions of sulfur dioxide for the previous calendar year from the affected unit; and

   (ii) Comply with the applicable Acid Rain emissions limitations for sulfur dioxide.

(2) Each ton of sulfur dioxide emitted in excess of the Acid Rain emissions limitations for sulfur dioxide shall constitute a separate violation of the Act.

(3) An affected unit shall be subject to the requirements under paragraph (1) of the sulfur dioxide requirements as follows:

   (i) Starting January 1, 2000, an affected unit under WAC 173-406-103(1)(b); or

   (ii) Starting on the later of January 1, 2000 or the deadline for monitor certification under 40 CFR part 75, an affected unit under WAC 173-406-103(1)(c).

(4) Allowances shall be held in, deducted from, or transferred among Allowance Tracking System accounts in accordance with the Acid Rain Program.

(5) An allowance shall not be deducted in order to comply with the requirements under paragraph (1) of the sulfur dioxide requirements prior to the calendar year for which the allowance was allocated.

(6) An allowance allocated by the Administrator under the Acid Rain Program is a limited authorization to emit sulfur dioxide in accordance with the Acid Rain Program. No provision of the Acid Rain Program, the Acid Rain permit application, the Acid Rain permit, or an exemption under 40 CFR 72.7, 40 CFR 72.8, WAC 174-406-104, or WAC 173-406-105 and no provision of law shall be construed to limit the authority of the United States to terminate or limit such an authorization.

(7) An allowance allocated by the Administrator under the Acid Rain Program does not constitute a property right.

**Nitrogen Oxides Requirements**

The owners and operators of the River Road Generating Plant and each affected unit at the River Road Generating Plant shall comply with the applicable Acid Rain emissions limitation for nitrogen oxides.

**Excess Emissions Requirements**

(1) The designated representative of an affected unit that has excess emissions in any calendar year shall submit a proposed offset plan, as required under 40 CFR Part 77.

(2) The owners and operators of an affected unit that has excess emissions in any calendar year shall:

   (i) Pay without demand the penalty required, and pay upon demand the interest on that penalty, as required by 40 CFR part 77; and

   (ii) Comply with the terms of an approved offset plan, as required by 40 CFR Part 77.

**Recordkeeping and Reporting Requirements**

(1) Unless otherwise provided, the owners and operators of the River Road Generating Plant and
each affected unit at the River Road Generating Plant shall keep on site at the source each of
the following documents for a period of 5 years from the date the document is created. This
period may be extended for cause, at any time prior to the end of 5 years, in writing by the
Administrator or permitting authority:
(i) The certificate of representation for the designated representative for the source and each
affected unit at the source and all documents that demonstrate the truth of the statements
in the certification of representation, in accordance with 40 CFR 72.24; provided that the
certificate and documents shall be retained on site at the source beyond such 5-year
period until such documents are superseded because of the submission of a new
certificate of representation changing the designated representative;
(ii) All emissions monitoring information, in accordance with 40 CFR part 75, provided that
to the extent that 40 CFR part 75 provides for a 3-year period for recordkeeping, the 3-
year period shall apply;
(iii) Copies of all reports, compliance certifications, and other submissions and all records
made or required under the Acid Rain Program; and
(iv) Copies of all documents used to complete an Acid Rain permit application and any other
submission under the Acid Rain Program or to demonstrate compliance with the
requirements of the Acid Rain Program.

(2) The designated representative of the River Road Generating Plant and each affected unit at the
River Road Generating Plant shall submit the reports required under the Acid Rain Program,
including those under 40 CFR part 72 and 40 CFR part 75.

Liability
(1) Any person who knowingly violates any requirement or prohibition of the Acid Rain
Program, a complete Acid Rain permit application, an Acid Rain permit, or an exemption
under 40 CFR 72.7, 40 CFR 72.8, WAC 173-406-104, or WAC 173-406-105, including any
requirement for the payment of any penalty owed to the United States, shall be subject to
enforcement pursuant to section 113(c) of the Act and by the permitting authority pursuant to
Revised Code of Washington (RCW) 70.94.430, RCW 70.94.431 and RCW 70.94.435.
(2) Any person who knowingly makes any false, material statement in any record, submission, or
report under the Acid Rain Program shall be subject to criminal enforcement pursuant to
section 113(c) of the Act and 18 U.S.C. 1001 and by the permitting authority pursuant to
RCW 70.94.430.
(3) No permit revision shall excuse any violation of the requirements of the Acid Rain Program
that occurs prior to the date that the revision takes effect.
(4) The River Road Generating Plant and each affected unit at the River Road Generating Plant
shall meet the requirements of the Acid Rain Program.
(5) Any provision of the Acid Rain Program that applies to the River Road Generating Plant
(including a provision applicable to the designated representative of an affected unit) shall
also apply to the owners and operators of the River Road Generating Plant and to the affected
units at the River Road Generating Plant.
(6) Any provision of the Acid Rain Program that applies to an affected unit at the River Road
Generating Plant (including a provision applicable to the designated representative of an
affected unit) shall also apply to the owners and operators of such unit.
(7) Each violation of a provision of WAC 173-406-100 through 173-406-950 and 40 CFR parts
72, 73, 75, 76, 77, and 78, and regulations implementing section 410 of the Act by an
affected source or affected unit, or by an owner or operator or designated representative of
such source or unit, shall be a separate violation of the Act.
Effect on Other Authorities

No provision of the Acid Rain Program, an Acid Rain permit application, an Acid Rain permit, or an exemption under 40 CFR 72.7 or 72.8 shall be construed as:

1) Except as expressly provided in title IV of the Act, exempting or excluding the owners and operators and, to the extent applicable, the designated representative of an affected source or affect unit from compliance with any other provision of the Act, including the provisions of Title I of the Act relating to applicable National Ambient Air Quality Standards or State Implementation Plans;

2) Limiting the number of allowances a unit can hold; provided, that the number of allowances held by the unit shall not affect the source's obligation to comply with any other provisions of the Act;

3) Requiring a change of any kind in any state law regulating electric utility rates and charges, affecting any state law regulating such state regulation, or limiting such state regulation, including any prudence review requirements under such state law;

4) Modifying the Federal Power Act or affecting the authority of the Federal Energy Regulatory Commission under the Federal Power Act; or

5) Interfering with or impairing any program for competitive bidding for power supply in a state in which such program is established.

5) Permit Application

A permit application for a gas-fired combustion turbine (Unit ID #1) was received by SWCAA on March 27, 2015. A copy of the permit application is included below.
STEP 1

Identify the facility name, state, and plant code.

<table>
<thead>
<tr>
<th>Facility (Source) Name</th>
<th>State</th>
<th>Plant Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>River Road Generating Plant</td>
<td>WA</td>
<td>07605</td>
</tr>
</tbody>
</table>

STEP 2

Enter the unit ID# for every affected unit at the affected source in column "a."

Acid Rain Permit Application

For more information, see instructions and 40 CFR 72.30 and 72.31.

This submission is: [ ] New  [ ] Revised  [x] for ARP permit renewal

Permit No. SW99-9-R3

C-6

April 3, 2019
Permit Requirements

STEP 3

The designated representative of each affected source and each affected unit at the source shall:

(i) Submit a complete Acid Rain permit application (including a compliance plan) under 40 CFR part 72 in accordance with the deadlines specified in 40 CFR 72.30; and
(ii) Submit in a timely manner any supplemental information that the permitting authority determines is necessary in order to review an Acid Rain permit application and issue or deny an Acid Rain permit;

(2) The owners and operators of each affected source and each affected unit at the source shall:

(i) Operate the unit in compliance with a complete Acid Rain permit application or a superseding Acid Rain permit issued by the permitting authority; and
(ii) Have an Acid Rain Permit.

Monitoring Requirements

(1) The owners and operators and, to the extent applicable, designated representative of each affected source and each affected unit at the source shall comply with the monitoring requirements as provided in 40 CFR part 75.

(2) The emission measurements recorded and reported in accordance with 40 CFR part 75 shall be used to determine compliance by the source or unit, as appropriate, with the Acid Rain emissions limitations and emissions reduction requirements for sulfur dioxide and nitrogen oxides under the Acid Rain Program.

(3) The requirements of 40 CFR part 75 shall not affect the responsibility of the owners and operators to monitor emissions of other pollutants or other emissions characteristics at the unit under other applicable requirements of the Act and other provisions of the operating permit for the source.

Sulfur Dioxide Requirements

(1) The owners and operators of each source and each affected unit at the source shall:

(i) Hold allowances, as of the allowance transfer deadline, in the source’s compliance account (after deductions under 40 CFR 73.34(c)), not less than the total annual emissions of sulfur dioxide for the previous calendar year from the affected units at the source; and
(ii) Comply with the applicable Acid Rain emissions limitations for sulfur dioxide.

(2) Each ton of sulfur dioxide emitted in excess of the Acid Rain emissions limitations for sulfur dioxide shall constitute a separate violation of the Act.

(3) An affected unit shall be subject to the requirements under paragraph (1) of the sulfur dioxide requirements as follows:

(i) Starting January 1, 2000, an affected unit under 40 CFR 72.6(a)(2); or
(ii) Starting on the later of January 1, 2000 or the deadline for monitor certification under 40 CFR part 75, an affected unit under 40 CFR 72.6(a)(3).
Sulfur Dioxide Requirements, Cont'd.

STEP 3, Cont'd.

(4) Allowances shall be held in, deducted from, or transferred among Allowance Tracking System accounts in accordance with the Acid Rain Program.

(5) An allowance shall not be deducted in order to comply with the requirements under paragraph (1) of the sulfur dioxide requirements prior to the calendar year for which the allowance was allocated.

(6) An allowance allocated by the Administrator under the Acid Rain Program is a limited authorization to emit sulfur dioxide in accordance with the Acid Rain Program. No provision of the Acid Rain Program, the Acid Rain permit application, the Acid Rain permit, or an exemption under 40 CFR 72.7 or 72.8 and no provision of law shall be construed to limit the authority of the United States to terminate or limit such authorization.

(7) An allowance allocated by the Administrator under the Acid Rain Program does not constitute a property right.

Nitrogen Oxides Requirements

The owners and operators of the source and each affected unit at the source shall comply with the applicable Acid Rain emissions limitation for nitrogen oxides.

Excess Emissions Requirements

(1) The designated representative of an affected source that has excess emissions in any calendar year shall submit a proposed offset plan, as required under 40 CFR part 77.

(2) The owners and operators of an affected source that has excess emissions in any calendar year shall:

(i) Pay without demand the penalty required, and pay upon demand the interest on that penalty, as required by 40 CFR part 77; and

(ii) Comply with the terms of an approved offset plan, as required by 40 CFR part 77.

Recordkeeping and Reporting Requirements

(1) Unless otherwise provided, the owners and operators of the source and each affected unit at the source shall keep on site at the source each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time prior to the end of 5 years, in writing by the Administrator or permitting authority:

(i) The certificate of representation for the designated representative for the source and each affected unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation, in accordance with 40 CFR 72.24; provided that the certificate and documents shall be retained on site at the source beyond such 5-year period until such documents are superseded because of the
submit a new certificate of representation changing the designated representative:

STEP 3, Cont'd. Recordkeeping and Reporting Requirements, Cont'd.

(ii) All emissions reporting information, in accordance with 40 CFR part 75, provided to the extent that 40 CFR part 75 provides for a 3-year period for recordkeeping, the 3-year period shall apply.

(iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the Acid Rain Program; and,

(iv) Copies of all documents used to complete an Acid Rain permit application and any other submission under the Acid Rain Program or to demonstrate compliance with the requirements of the Acid Rain Program.

(2) The designated representative of an affected source and each affected unit at the source shall submit the reports and compliance certifications required under the Acid Rain Program, including those under 40 CFR part 72 subpart I and 40 CFR part 75.

Liability

(1) Any person who knowingly violates any requirement or prohibition of the Acid Rain Program, a complete Acid Rain permit application, an Acid Rain permit, or an exemption under 40 CFR 72.7 or 72.8, including any requirement for the payment of any penalty owed to the United States, shall be subject to enforcement pursuant to section 113(c) of the Act.

(2) Any person who knowingly makes a false, material statement in any record, submission, or report under the Acid Rain Program shall be subject to criminal enforcement pursuant to section 113(c) of the Act and 18 U.S.C. 1001.

(3) No permit revision shall excuse any violation of the requirements of the Acid Rain Program that occurs prior to the date that the revision takes effect.

(4) Each affected source and each affected unit shall meet the requirements of the Acid Rain Program.

(5) Any provision of the Acid Rain Program that applies to an affected source (including a provision applicable to the designated representative of an affected source) shall also apply to the owners and operators of such source and of the affected units at the source.

(6) Any provision of the Acid Rain Program that applies to an affected unit (including a provision applicable to the designated representative of an affected unit) shall also apply to the owners and operators of such unit.

(7) Each violation of a provision of 40 CFR parts 72, 73, 74, 75, 76, 77, and 78 by an affected source or affected unit, or by an owner or operator or designated representative of such source or unit, shall be a separate violation of the Act.

Effect on Other Authorities

No provision of the Acid Rain Program, an Acid Rain permit application, an Acid Rain permit, or an exemption under 40 CFR part 72.7 or 72.8 shall be construed as:
(1) Except as expressly provided in title V of the Act, exempting or excluding the owners and operators and to the extent applicable the designated representative of an affected source or affected unit from compliance with any other provision of the Act, including the provisions of title I of the Act relating.

Effect on Other Authorities, Cont'd.

To applicable National Ambient Air Quality Standards or State Implementation Plans:
(2) Limiting the number of allowances a source can hold; provided, that the number of allowances held by the source shall not affect the source's obligation to comply with any other provisions of the Act;
(3) Requiring a change of any kind in any State law regulating electric utility rates and charges, affecting any State law regarding such State regulation, or limiting such State regulation, including any prudence review requirements under such State law;
(4) Modifying the Federal Power Act or affecting the authority of the Federal Energy Regulatory Commission under the Federal Power Act; or
(5) Interfering with or impairing any program for competitive bidding for power supply in a State in which such program is established.

Certification

I am authorized to make this submission on behalf of the owners and operators of the affected source or affected units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.
